Sri Vidya Ganapathi

Message from Chairman

“Education is the manifestation of perfection present already in a man”

- Swami Vivekananda

Human excellence is the true aim of education. True to this axiom, P S Senior Secondary School since its inception on 9th June 1976 focuses on Academics as well as Activities that foster holistic development in children. The children are being taught how to think as the future belongs to those who believe in the beauty of their dreams. Education develops the personality of the students, mould their character and develop mental skills to help them to cope with the problems and challenges of the complex world of today. PSSSS strive to make the students successful not only in their life but make them conscious of their responsibilities and duties to various stakeholders.

The aim of our School is to promote a system of integral education in a congenial child friendly environment that emphasises the unity of all knowledge, synthesises humanity and sciences and recognises the fact that each child is unique. We believe that education should enable students to soar high morally, socially and spiritually.

“Educationalist should build capacities of the spirit of inquiry, creativity, entrepreneurial and moral leadership among students and become their role model” - Dr A P J Abdul Kalam

Our Teachers under the ablest guidance of Principal, place a renewed emphasis on the humanistic dimensions of education enabling each student to grasp and appreciate the individuality of others, and to discover one's own self through an inner journey, whose milestones are, knowledge, introspection and humility.

Our school curriculum allows our teachers the flexibility to adopt innovative methods to stimulate interest and attention among students and develop in them an appreciation for the values of the past, the excitement of the present and the challenges of the future. Our teachers give priority to the teaching of critical thinking skills such as reasoning and problem solving to help our students to develop the ability to reach sound conclusions based on information and observation.

Wishing PSSSS all the best in its continuing endeavour of creating Future Leaders of our Great Nation India.

- Sri M S Sundararajan
Chairman

MESSAGE FROM CORRESPONDENT

Formal expressions like “I am delighted” or “I am pleased” etc. will be grossly inadequate to express my happiness to see that the e-magazine of the School has been put together amidst challenging circumstances by the dedicated group of ebullient and talented students for the academic year 2021-22.

P.S. Senior Secondary School, which is proudly marching towards its Golden Jubilee, unarguably is one of the best in its category as well as one of the most sought after in the city of Chennai.

Ever since I took over as the Correspondent of this great institution, I am never short in awe when I see (a) the remarkable efficiency of the Principal both in academic and administration fronts, (b) the unstinted support given to her by both the Vice Principals, (c) the enormous dedication of the teachers all of whom have, with least of hesitation rose to meet the challenges of e-teaching, (d) the hard work put in by all the non-teaching staff right from administrative and accounting staff, support staff down to ayahs etc., and of course (e) the brilliant pool of students that we have.

Education has been one of the worst victims of the Pandemic all over the world for almost two successive academic years and no amount of innovations in ‘online’ mode of teaching can ever substitute the actual interaction that students can have with teachers as well as with peers in the normal physical mode. The so-called ‘new normal’ is like climbing on an escalator that travels the wrong way. It takes a great amount of effort to keep running even to stay where we are. However, to the credit of PSSSS, I must be candid enough to admit that the teachers and the students are putting their best feet forward.

It was an exhilarating moment for me and the Principal when we were informed that “Education Today”, a leading Indian magazine focusing on the school education, has ranked PSSSS as No.1 in India under the parameter “Student advancement and mentoring”. This proud recognition, of course, I am aware, is due to the unstinted efforts of the Principal, who was ably guided by the two immediate former Correspondents Dr. K.V.S.Gopalakrishnan and Sri R.Sivakumar, in their respective terms. In fact, it is the combined effort of all our previous Correspondents and former Principals that the school has attained the eminence that it has. To all of them, we owe our immense gratitude.

The recent elevation of our illustrious alumnus Dr V. Kamakoti as the Director of the prestigious and world-famous Indian Institute of Technology-Madras, is another proud milestone of our school.

The extra-curricular activities, cultural activities, career counselling sessions for students, beyond the curriculum initiatives (the setting up of a robotics lab under the name of C N Rao Sastra STEM lab with the assistance of SASTRA University is an important milestone), have all been important hallmarks of our great institution.

One of the most precious duties of educational institutions like ours is to inculcate into the young minds, the pristine qualities of devotion to Almighty, the Mother Nation, Parents, Teachers and other elders thus transforming them as the most ideal and responsible citizens. I believe, at PSSSS, we are doing our best.

Our students have been excelling both in academics and in other fields like fine arts, debating, Olympiad, sports etc. and have been doing the school as well as their parents mighty proud. The talents that they display and the enthusiasm they show in all the school activities are amazing.

The alumni of the school, many of whom are occupying stellar positions and shining as proud jewels in several fields play a great role and have been a source of strength to the school.

Before I sign off, I have to acknowledge the guidance received from the parent body P.S. Educational Society as well as the School Management committee and the supportive role played by the Parent Teachers Association.

**- Shri Pennathur Subramaniam Prabhakar
Hony. Secy & Correspondent**

MESSAGE FROM PRINCIPAL

The annual magazine gives me a delightful opportunity to share with happiness and pride our achievements of the year 2021 – 2022. The challenges of the pandemic have not dampened our spirits but have firmed our resolve to offer quality education to our children. This was made possible by the focused efforts of our dedicated team of teachers and staff. As this magazine unfolds one can see the plethora of opportunities offered to the students to express themselves.

I am happy to announce that the sincere efforts of our students have been truly rewarded and brought laurels to our school both in academics, co-curricular activities at National and International levels. Aarnav S. of Class XII topped the science group scoring 496 marks out of 500 in the CBSE examination. S. Sharadha topped the Class XII commerce group scoring 492 marks out of 500. Madussree Ravi and Manasa Shriraam topped Class X scoring 497 marks out of 500.

Our school has been forerunners in sports as well. Hansini M of Class VIID has won the title in Under 13 category in World Table Tennis Muscat Youth Contender Tournament and runner up in under 15 category. She received the trophy from His Highness Sayyid Fatik bin Fahar al-Said, Diwan of Royal Court in the Sultanate of Oman.

Hansini M also won the State Championship title in both Under 13 and Under 17 Table Tennis tournaments organised by the Tamil Nadu Table Tennis association on 20th and 21st of November 2021.

The school is known for its talent in Carnatic music. Mukund Bharadwaj L of Class XIIA secured 2nd place in Kala Utsav (a national level competition conducted by the Ministry of Education and NCERT, Government of India) in the classical vocal music category representing Tamil Nadu. He had earlier secured First place in the district level competition held at Chennai and state level competition held at Salem and qualified to represent the state in the national level. Kala Utsav is an initiative of the Ministry of Education (MoE) under Rashtriya Madhyamik Shiksha Abhiyan, to promote arts in education by nurturing and showcasing the artistic talent of school students.

In an effort to promote the latest trends in education, the School offers Artificial Intelligence as an additional subject in Classes IX and X. The School has recently inaugurated the STEM lab with the Vice Chancellor of Sastra University as the Chief Guest. We are grateful to Sastra University for sponsoring and setting up this Lab.

This Lab will help to promote creativity and innovative thinking among students as it will provide them project based learning through hands-on activities. This is in line with the national education policy and the new initiatives introduced by the CBSE to shift to an education system which aims to cultivate critical thinking and prepare them for a knowledge and technology driven society.

I thank the school management for extending complete support in all our activities. I thank our former correspondent Dr.K.V.S.Gopalakrishnan for his guidance and valuable advice. I thank Shri P.S.Prabhakar honorary secretary and Correspondent for all his encouragement, commitment and involvement in all our endeavours.

“Education is not filling up a pail but lighting a fire”.

W. B. Yeats

- Dr. Revathy Parameswaran
Principal

A Message from the Editorial Team

It is the pleasure of the editorial team to inaugurate the annual PS magazine of the year 2021-2022! We want to start by saying that we are incredibly grateful for the opportunity given to us by the respected principal and the English department (who usually work day and night on the school magazine).

All official statements aside, we are very excited to present you guys, Shrishti 21-22! After tens and hundreds of meetings, we've strung together what we hope is a fresher perspective on cultural events, achievements, and just the general happenings in our school.

This year's magazine will be a little different - the magazine will begin with six spreads that are linked to the student entries. Each spread is dedicated to a theme, which thematically connects with the entries themselves. In the pages after that, there will be a timeline of the events of the year. The events in the timeline will be linked to the articles, written by us!

We hope to encapture the spirit of our student community, to put forward the best representation of us, as students of PS! Hopefully, we are able to put a smile on all your faces! So sit back, grab a tub of popcorn, and enjoy!

Shrishti '21 - The editorial board

PS SENIOR PROUDLY PRESENTS:

LEGACY OF SPORTS

The school has various sports teams that place medals in inter-school competitions, among which our school's girls football team is highly celebrated. PS also conducts intra-school competitions every year to discover budding talents.

Intramurals is the yearly competition wherein students from the four houses - Ruby, Emerald, Sapphire, and Topaz - headed by their respective house captains compete and play to secure points. The house with the most points is decorated on Sports Day and is given the prestigious title of "Overall Championship".

Students look forward to Sports Day that has been conducted in the Jawaharlal Nehru Stadium in 2018 and 2019. House-wise march past is a delightful sight followed by the finals to various individual events. Prize winners of the events are announced on the same day.

Unfortunately, due to the pandemic, there have been no major sports activities in the last 2 years.

- Words from the Sports Secretary

**THIS
YEAR**

We are pleased to announce new logos for the four school sports houses.

Initiated by TFE Team 2022, the logos stand for the primary principles of the teams, united in their objective of glory and method of discipline.

RUBY

The permanence of a paradox, exhibited in blooming festivities; Ruby recalls the stronghold of triumph the team displays. We are proud to present a logo that flaunts the pride and vigor of Ruby.

EMERALD

The paragon of dedication, Emerald paints a picture of sharp and vibrant spring. The team is known for their vigor and stamina, and are by nature infinite in instinct. Unveiling for the very first time: the lively logo of Emerald.

SAPPHIRE

The indigo taste of victory and royal laurels rejoice at Sapphire entering the stadium. The team is intensely competitive and savvy, and values patient practice above all else. Presenting: Sapphire's logo.

TOPAZ

Bringing with it a lethal focus and subtly displayed expertise, Topaz has a unique, commanding glamor to it that often goes unnoticed. The house is hardworking and welcoming to its new recruits, and chiefly values dedication. Exhibiting: the lavish logo of Topaz.

An Ode Long Overdue

On the brink of esteemed gratitude, but never quite realized; these thirteen women, each one quoting a service of at least twelve to thirteen years, maintain our beloved campus of almost 3.2 acres six days a week.

When asked about the more than 2700 students across the school, they break into smiles and earnestly launch into speeches of appreciation. The area they cover for maintenance changes each year, and they concede that students across the school are disciplined and respectful. The Primary Block and KG Dept. have their hearts in a firm hold. "The laughter of the entire block was irresistible," say Rukmini Akka and Pazhani Akka, who have been employees of the school for twenty-odd years. "We only wish for the children to come back to school - to study, to learn, to laugh."

"The teachers, too!" is added as a chorus. "All of them are lovely to us, cheerful always." "The office staff and the PE Department are very pleasant, and friendly too," they add. "They treat us like family."

Once the photographs were taken, I was ushered into a small area beside the PE room where a small group was gathered. "We'd like to add one last thing," they said, "When corona came, the principal of our school didn't deny us a single thing, and ensured we were cared for; we'd like you to put our thanks - all fourteen of ours - out to her; it's because of her that we were safe and our families were fed, and no amount of gratitude is hyperbole."

As I walked out, all I could think about was that they'd said "our school."

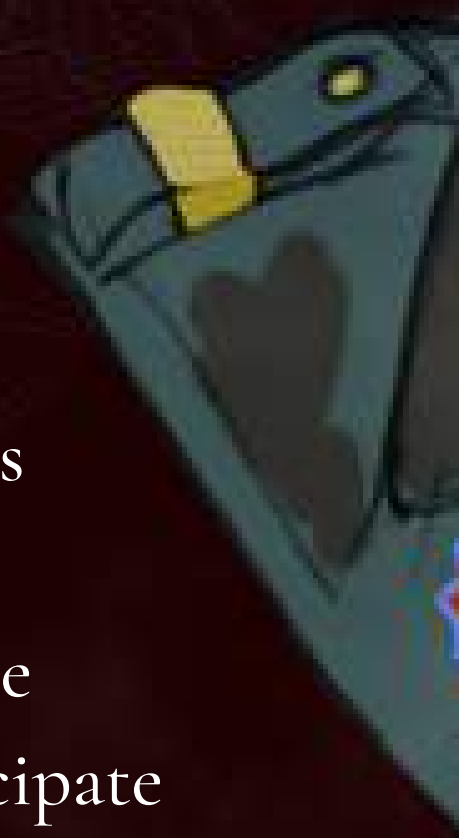

The Office Staff

**THE BACKBONE OF ADMINISTRATION OF
PS SENIOR SECONDARY SCHOOL**

War & History

War has been in the history of mankind from time immemorial. The emotional dimension of war remains understudied. It affects combatants and non-combatants alike, both physically and emotionally. The terror and horror of such conflicts disrupt lives and severes relationships and families, leaving individuals and communities distressed. The explanations of the underlying motivation to participate in wars however remains unsatisfactory. So, why do wars happen? Will we ever be able to completely eradicate war from the external world as long as the conflict remains in the minds of mankind?

Soul & Spirit

We often ask ourselves many questions, the answers to which may be beyond our understanding. Such questions and the quests for their answers often open new doors to and in the inner self and help us better ourselves. Life is a beautiful question paper in which questions are answered, not after learning, but during the process of learning, and learning is done by experience. Such questions, about the soul and the spirit, may range from apparently simple ones like 'Who am I?' to fully complex ones like 'What is the purpose of our existence?' and so on. There is no real limit to the number of questions that can be asked. And so, this is a really interesting topic to explore in science and even more in art and literature. We have brought to you some works of the students of our school on common topics of day to day life like 'What a home is', 'Family and relationships', 'Childhood', 'Books', 'Sky' and 'Rainbow' and also on topics like 'Immortality', 'How to live a life', 'What should be one's aim in life' and much more.

DYSTOPIA

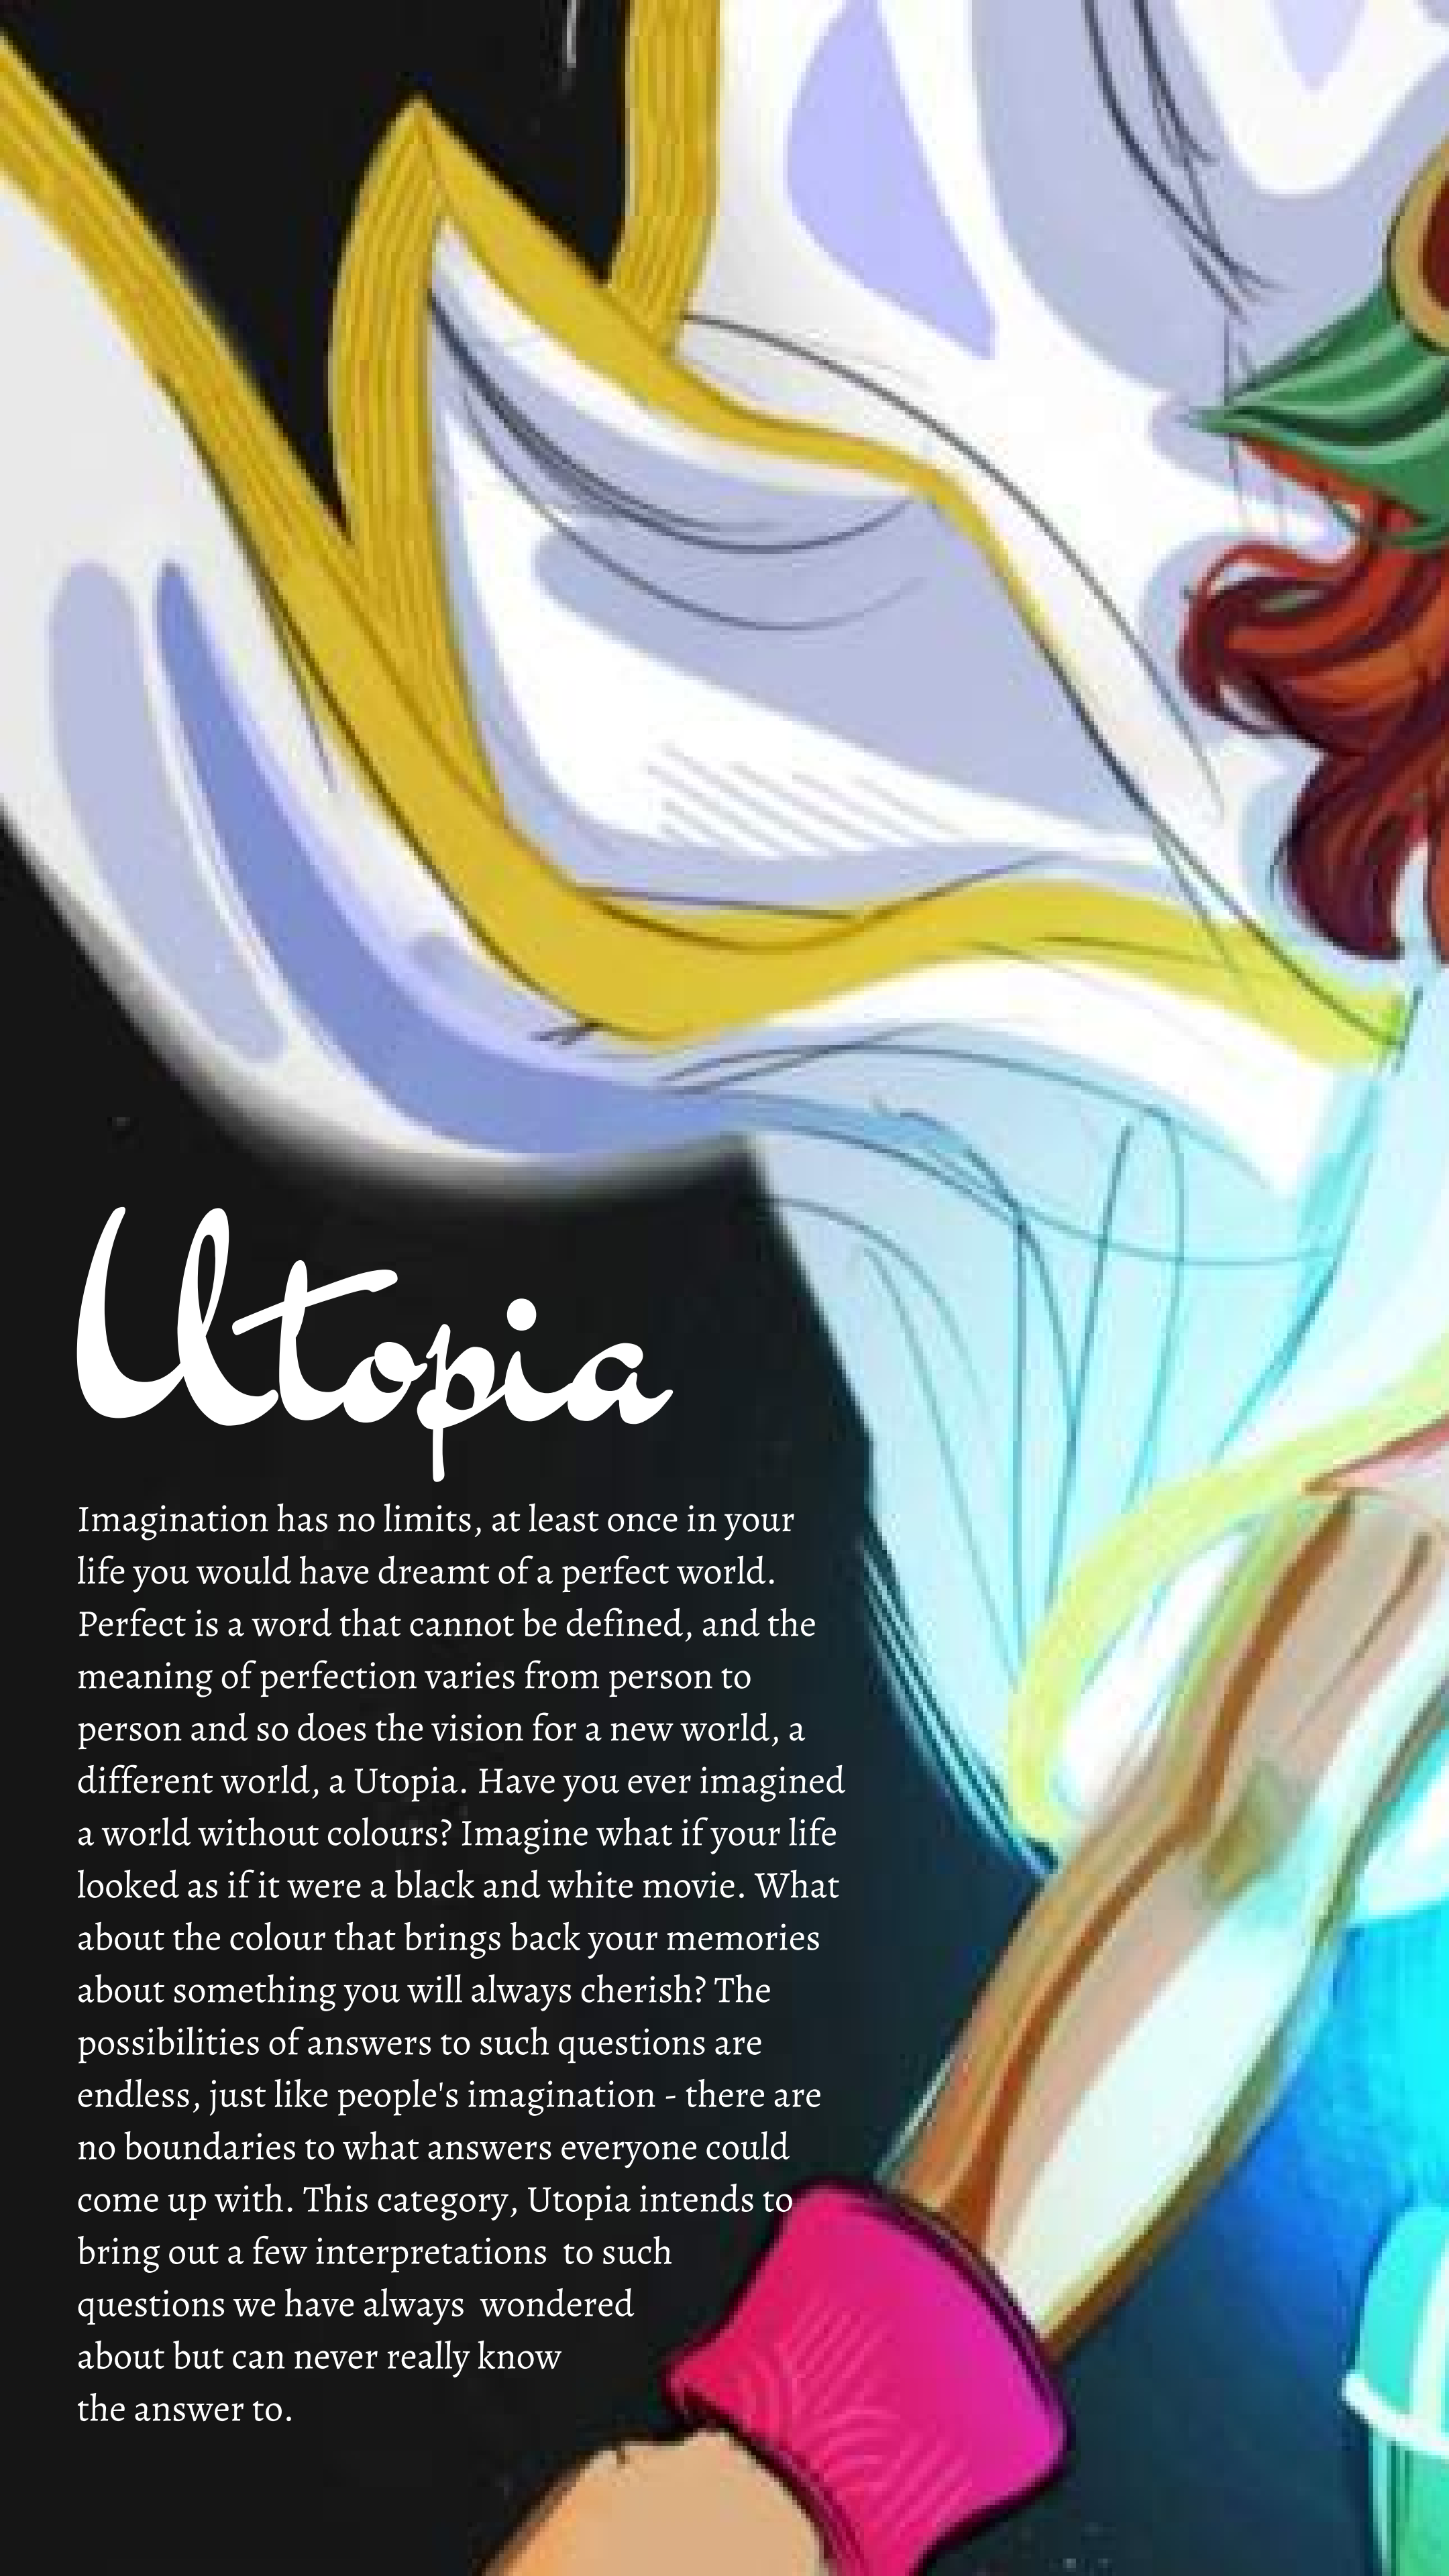

The world is ever-changing. Civilizations morph with time. The ever-fleeting time, so unpredictable, so unmerciful-almost non-hesitantly destroys societies, cleaves happiness, and buries compassion. The dystopian world deals with this effect of the wicked face of time. Ranging from despotic to bloodthirsty, the rulers, aided with imagination-defying technology, render the civilians helpless." What if?" is the question from where it all begins. The situation that seems so unlikely, yet completely plausible at the same time cannot begin to explain "what could be?". For all its darkness, dystopia

still shines bright with its glory, popular among many for its breathtaking adventure and spine-chilling experiences.

This section deals with futuristic societies, so amoral, so fictitious that it's too beautiful to not help but wonder "What if?.."

Utopia

Imagination has no limits, at least once in your life you would have dreamt of a perfect world. Perfect is a word that cannot be defined, and the meaning of perfection varies from person to person and so does the vision for a new world, a different world, a Utopia. Have you ever imagined a world without colours? Imagine what if your life looked as if it were a black and white movie. What about the colour that brings back your memories about something you will always cherish? The possibilities of answers to such questions are endless, just like people's imagination - there are no boundaries to what answers everyone could come up with. This category, Utopia intends to bring out a few interpretations to such questions we have always wondered about but can never really know the answer to.

ALIENS

When we think of aliens, the first thing we are taught is that they are an outer space being; a being whose looks we don't know, whose language we probably don't speak, whose culture we mostly don't follow. But in reality, in their point of view, an alien someone who is in a place that is different and new to them, where they feel not fitting in, or not understood, or just new. And that feeling may be when they go to a new planet, a new country, a new city, a new institution, or maybe in your surroundings where you have been going for years; it all depends on your personal growth and changes and the people in your life.

Is "alien" a person or an emotion?

THROUGH
THE LOOKI
NG GLASS

The dictionary definition of a mirror would be that it is merely a polished metal that reflects. But looking a little further, mirrors are a reflection of truth, a reflection of the soul. Mirrors are in fact, a threshold between the conscious and the subconscious.

This theme explores pain and deception, vanity and understanding. It presents a deeper way to see yourself; a journey of self-discovery. “A magic mirror, that embodies transient souls:

Who is that I see, standing before me, beyond the surface of glass? Who is that person, who carries my eyes, carries my smile, but it seems we're nothing alike?” What is it like to embrace being you? What is it like to detest being you? What is it like to be you?

School Events 2021 - 22

The Timeline

Great Master's Program

A program in the honor of the Carnatic music maestro, Padma Vibhushan, Sangeetha Kalanidhi (late) Semmangudi Srinivasa Iyer as part of the "Great Masters Series".

7th Feb

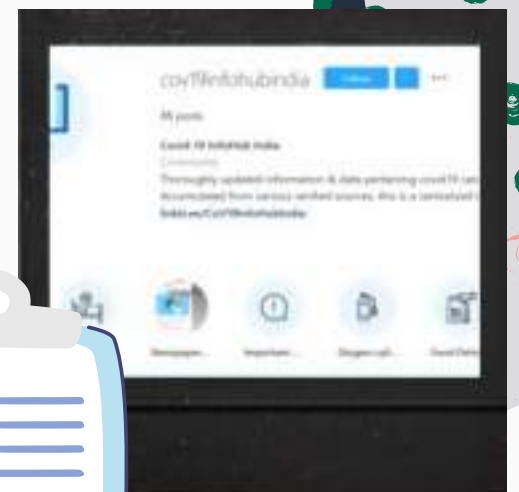

7th March

Pennum Pannum

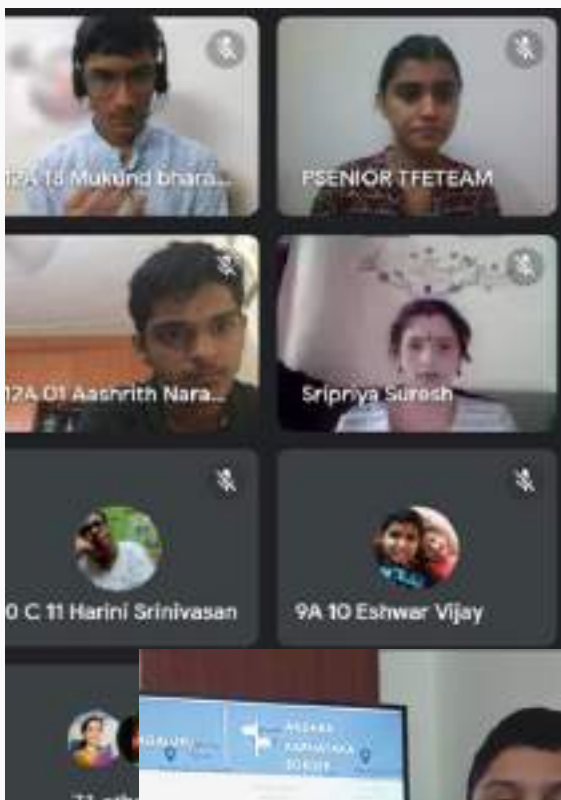

Organised by the Samuditha Foundation established by Vidwan Sakethraman, a thematic concert "Penum Pannum" was a celebration of women composers on International Women's day.

30th May

Covid 19 Info-hub

Students of Class XII created a virtual platform with resources, petitions, and verified information about the pandemic, helping hundreds around the city.

23rd and
24th July

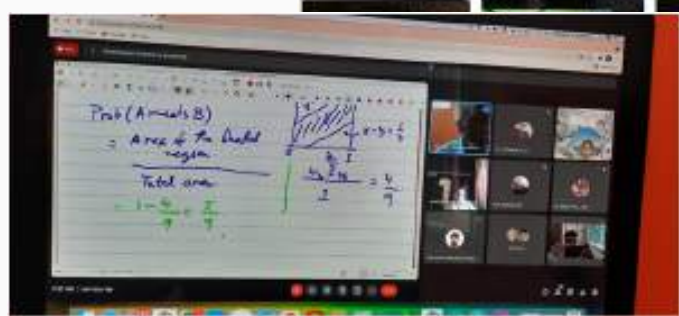

Renaissance

The Intra school cultural was conducted by our own class 12 students for classes 8 to 11. Usually conducted offline, this year it was online following all COVID 19 protocols.

Beyond Boundaries

A special series of lectures organised by our school for clear understanding and better grasping of difficult concepts.

June to
December

May - June

Workshops for Teachers

Workshops were conducted by our senior teachers, ranging from Tamil to English, while some workshops to even talk on Gender Matters was organised by our school. It was attended by most of the teachers from the PS Educational Society

Independence Day

Celebrated both online
by students of the KG
classes, and by
teachers, at school
following all protocols.

August
15th

GLPSS Convocation

Our school has always believed in offering students a lot of opportunities and exposure in order to develop their character and skills and this program is one such program held in partnership with the highly reputed Great Lakes institute for the students of Classes XI.

September
to January

Buddy Mentors

A teen teach initiative by "Bhoomika", a pilot in Pandeswaram Panchayat Tiruvallur District on 15th August. The program envisages the teaching interns (Grade 10, 11, and 12) from city schools teaching Government school children of classes 6 to 8, remote through zoom and Google meet.

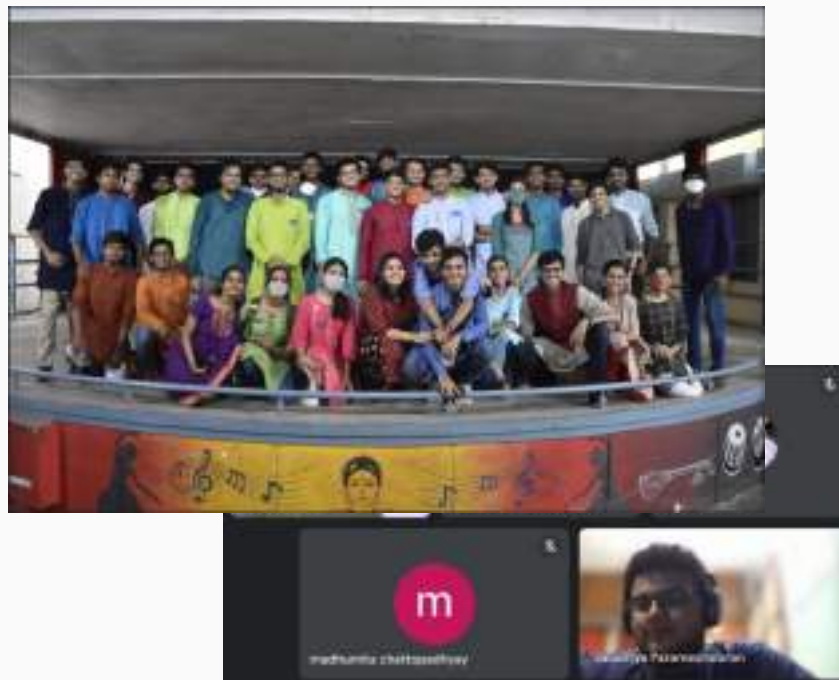

Career Guidance

For the students of classes XI and XII, our school conducted career counseling workshops for them to easily understand what they could want to pursue in college and in their careers.

Scintillations

September
17-18

Inter-school cultural events were organised by our class 12 students and viewed online by our students, where students of other schools participated in various events and won prizes.

September
10-11

PS MUN

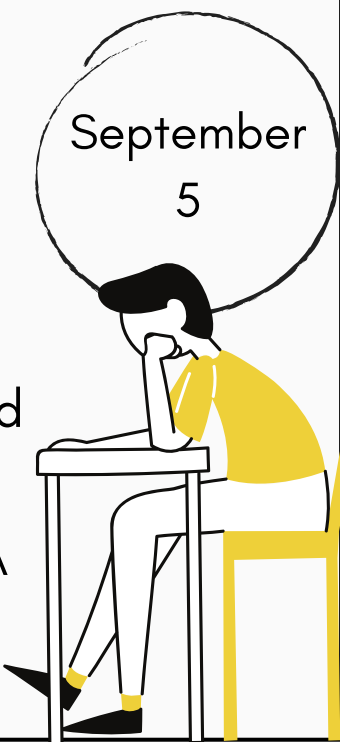

With the largest turnout in PS MUN history, PSMUN '21, proudly accommodated more than 160 delegates from all over the country, proving to be nothing less than sensational.

Teacher's Day

Celebrated teachers and staff members who had completed 10 years of service were honored during the occasion. Mementos were distributed to all teaching and non-teaching staff and all PTA Members.

September
5

Vijayadasami Celebrations

October 18

To celebrate what this day stood for, students and teachers of our school organised a Vijayadasami Programme on the 18th of October with the reopening of School on the same day.

Reunion of 1996 batch

13th December

The PS Batch of '96 met up for their silver jubilee, on December 18th, 2021

13th December

Bharathiyar Day

PS held a program to commemorate the celebrated Tamil writer, poet, and activist, Mahakavi Subramania Bharathi. The event was filled with songs, dances, and speeches memorializing the pre-eminent cultural figure.

Jan/Feb 11

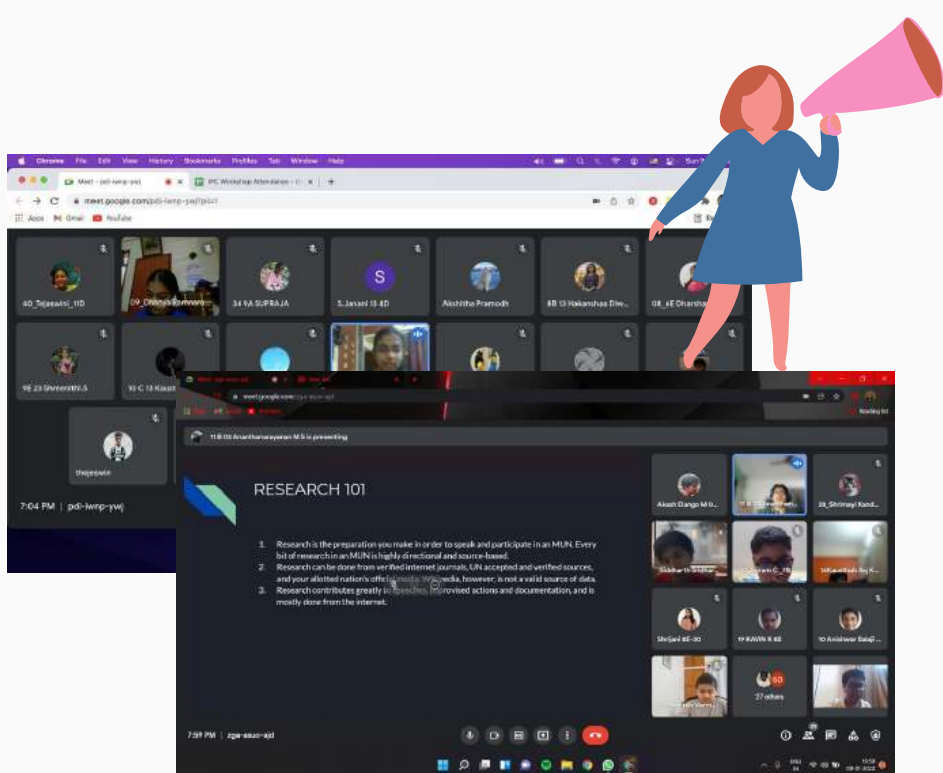

Vaccination Drive - COVID

Students of class 9,10,11 and 12 were vaccinated on 11.01.22 and 12.01.22 by CURI Hospital team organized by the School

C.N.R Rao Stem Lab

January 8

The P.S.Senior SASTRA C.N.R Rao STEM lab was inaugurated in our school campus on 08-01-2022 by Sri. S Vaidhya Subramaniam, Vice-Chancellor, SASTRA Deemed University,

January 3

MUN Workshops

To spark the creativity and interest of students, our school has organized MUN workshops for students of classes six to eleven. These workshops aim to give them the experience and knowledge of Model United Nations comprehensively.

Republic Day Celebrations

January
26

On 26th January 2022, we hosted Republic Day celebrations - The day marked 73 years since our constitution came into effect.

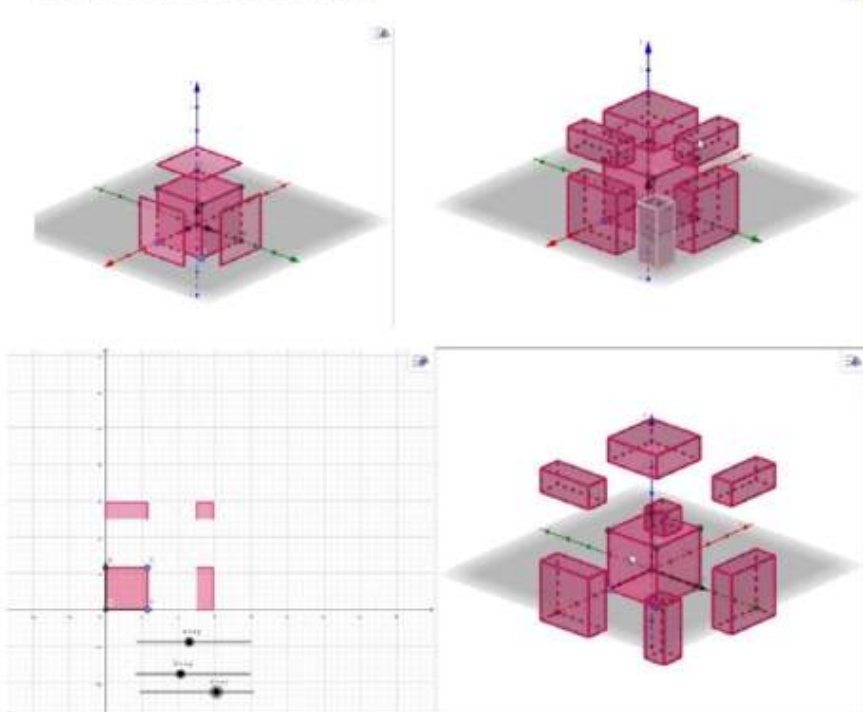

January ?

Math Week

The Maths Department of P S Senior Secondary School celebrated the glory of Srinivasa Ramanujan by having a week long math Activities for students of class 6 7 8 9 and 11 which spanned from 24th January to 30th January.

BINOMIAL THEOREM

February
7?

Science Week

For several years, the school has been conducting the science project for students. This year, it was conducted with even more enthusiasm because the students of classes 4 to 8 entered the campus almost after two years.

School Toppers, Student Prizes & Achievements, Teachers' Workshops

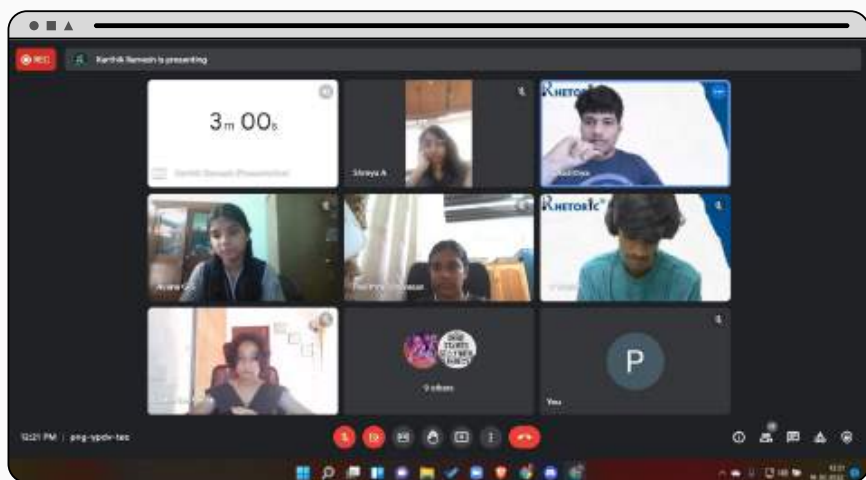

Economics Debate

The 2nd edition of the Economics Debate, took place on the 4th of March for the commerce students of classes 11 and 12 in an invigorating manner as the students expressed their ideas with a special focus on the Indian economy.

March 4

February 18

Rhetoric '22

Rhetoric '22 was organised by the school's debate team, overseen by Mrs. Jeyalakshmi and Mrs. Aarthi. After a brief inauguration ceremony invoking blessings, the principal Dr.

Revathy Parameswaran declared the event open after welcoming all the contestants.

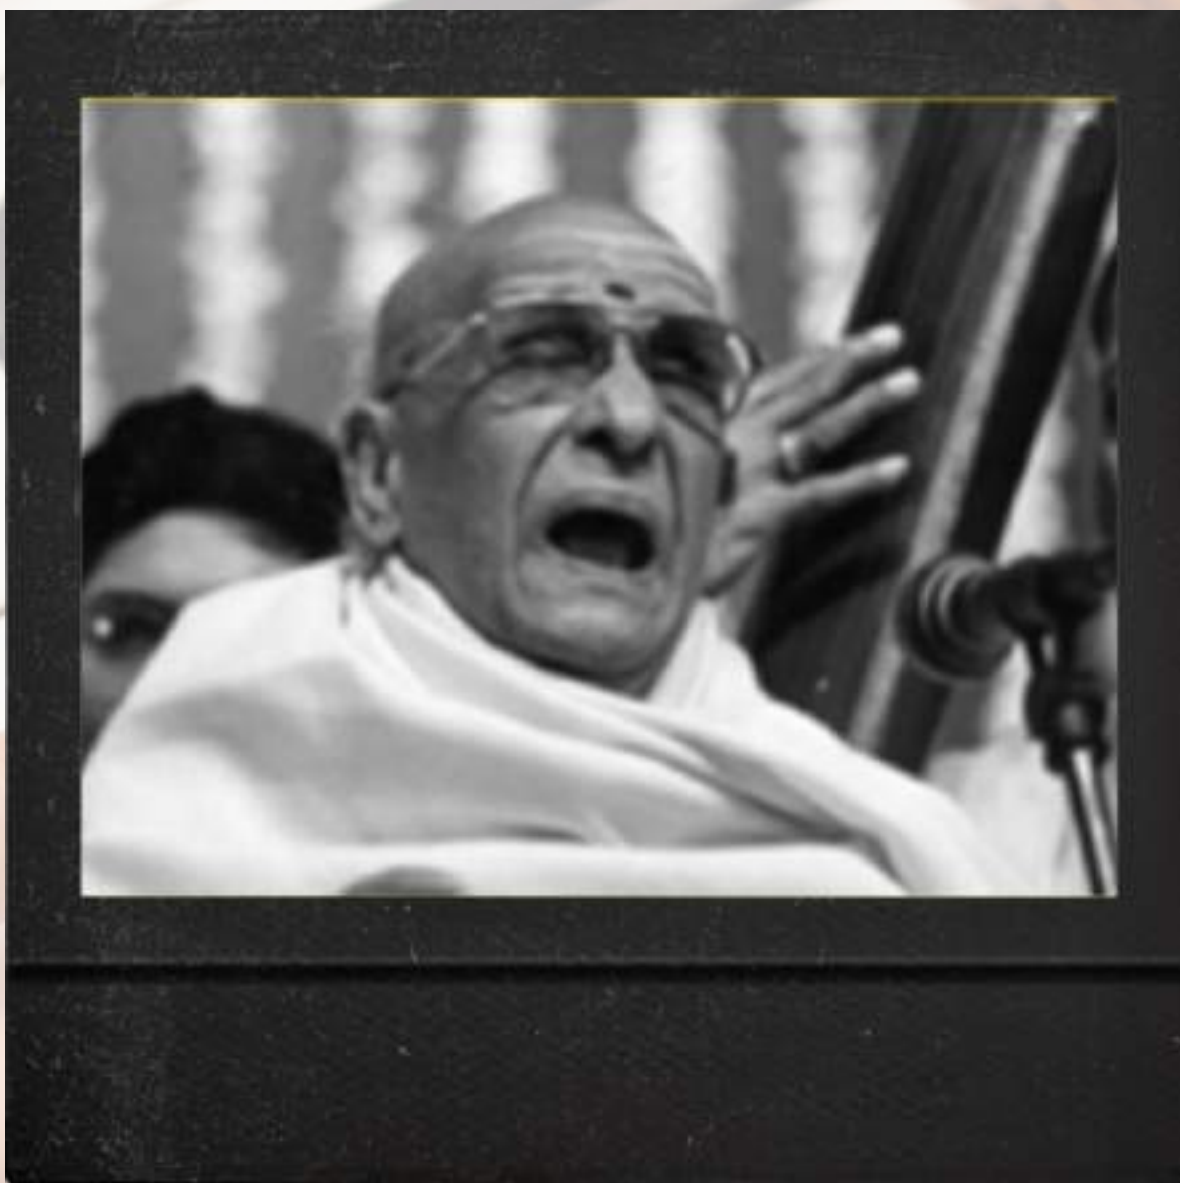

Penum Pannum Celebrating Women Composers

Samuditha Foundation established by Vidwan Sakethraman, organised a thematic concert "Penum Pannum", a celebration of women composers on the momentous occasion of International Women's Day. The music fiesta was convened at the acclaimed Narada Gana

Sabha on March 7th 2021. P.S.Senior students who are part of Kalashisksha class rendered impressive performances on the stage where Dr.Akhila Srinivasan presided the programme followed by Dr. Nithyashree Mahadevan and Dr. Bharathi Bhaskar who graced the celebration with their presence.

Spicmacay

(Society for the promotion of Indian Classical Music and Culture Amongst Youth) organised a programme on the 27th of February, 2021 in the honour of the carnatic music maestro, Padma Vibhushan, Sangeetha Kalanidhi (late) Semmangudi Srinivasa Iyer as part of the "Great Masters Series". The concert was once again organised on the 26th of February,

which was attended by students of middle school and class 11. The concert was presented by Vidushi Pantula Rama on the vocals, Vidwan MSN Murthy on the violin, Vidwan Sai Giridhar on the mridangam, and Vidwan B S Purushotham on the kanjira.

Our School was chosen as the Host Institution. Students of classes 8,9 & 10 participated in this virtual programme and performed enthusiastically and questioned the speakers of the day, Sri Palai Ramachandran and Sri.A.S.Murali. The participants were entertained with an exquisite concert of the maestro during this event.

COVID Info Hub

AN EFFORT PUT FOR
THE SOCIETY BY OUR
OWN STUDENTS

Back in April 2021, when COVID was at its peak and the nation was gripped with fear, a group of ten class XII students from our school decided to take the matter into their own hands. Akilesh Chandrasekar, Adithi L, Gayathri M Srinivas, Abhiram Reddy, Kavita Rajaraman, Akshya Subramanian, Aryan Sreeram Anand,

Sidaarth Naresh and Darshana Balakrishnan together created a virtual platform with resources, petitions, and verified information about the pandemic, helping hundreds around the city. Working round the clock, seven days a week, the volunteers only took days off for their entrance exams, or if they were ill. The team also had an Instagram account, where they put constant updates in the form of slideshows. Writer can also give facts and detailed information following answers to general questions like who, what, when, where, why and how.

INDEPENDENCE DAY

Independence promotes patriotism towards the nation and on the 74th Independence day, KG children enthusiastically contributed to the Independence day celebration. It is very important that our culture and history is passed on to the younger generation. By dressing up as freedom fighters, narrating their stories and spreading the message, the children learnt about the struggles of getting independence. The teachers also played a big role by

educating them about this and executing the program well. Independence day was celebrated with the right fervour and spirit, following social distance norms. Our principal, Dr. Revathy Parameswaran hoisted the flag and the national anthem was sung at school.

Buddy MENTORS

Sahitya, Sai Kshiraja and Rashmi – students of Class XII are all part of a programme initiated by Bhoomika Trust. As part of this, our school team of girls have taken up teaching students of Government Schools during this pandemic in the online mode.

“Bhoomika” launched Project Dhrithi- a teen teach initiative, a pilot in Pandeswaram Panchayat, Tiruvallur District on 15th August. The program envisages the teaching interns (Grade 10, 11 and 12) from city schools teaching Government school children of class 6 to 8, remote through zoom and Google meet.

They set up an activity centre with laptops, headphones and appointed a local coordinator from the village hoping to connect with 100 students in the course of the next 2 months. This initiative is likely to cover a few more villages also with these student mentors in action.

Our students are involved in working out the logistics of this project such as pooling in interns, resource developing material and designing the general go-about of this project apart from handling classes to the children.

🔍 Student Council Elections

🔍 School Pupil Leader

🔍 Cultural Secretary

🔍 TFE Editor

🔍 Sports Secretary

A quintessential element of any school is the annually held student council election, where students of class 12 campaign to showcase their passion for making the school a better place for everyone.

A ballot takes place (in which all students from classes 9 to 12 participate in), after which the students

with the highest number of votes are declared as members of the Student Council.

Due to the pandemic, the '21 batch was not able to engage in the elections.

In hopes of resuming everything as erstwhile, the elections were brought back. But this time, they were conducted fully online. Campaigning was done through short videos that were screened during classes. Voting took place through google-forms. The results were finally announced in a live stream. School principal Dr. Revathy Parameswaran spoke a few encouraging words, before announcing the results. Winners of the election campaigns finished with speeches.

Beyond Boundaries

PS Senior Secondary School has provided endless opportunities to students. Our school has always aimed far and beyond the normal curriculum. The Beyond Boundaries is a unique series presented by the school. Every year the school organizes lectures for better grasping and clear understanding of difficult concepts. These lectures are given by distinguished teachers. The program was planned to kindle the interest of students in different subjects and to help them gain a fresh perspective in that field. The students have got a fresh perspective on the subject.

On 12th June 2021, Beyond Boundary Program was held for class XII students. Dr. Parameswaran Sankaran, Professor from Chennai Mathematical Institute and Science Congress awardee spoke about problems in Probability and discussed Monty Hall problems. The students actively participated in the lecture.

From 21st June 2021, Professor K.S. Balaji, Ph.D. in Physics from the University of California gave an interesting lecture on the topic 'Laws of Motion. Four sessions were conducted and the students were able to understand the concept of vectors.

On 7th August 2021, the students of class XI attended a lecture on the topic of Thermodynamics conducted by Dr. I Arockiaraj, Assistant Professor from St Joseph's College.

He has received medals from Dr. A.P.J Abdul Kalam, ISRO Dr. Krishnan, and Dr. Fatima Beevi. The concepts became easier to understand because of the simple manner in which they were taught.

Dr. Sankaran Viswanath, Professor, and Dr. Anup Biswanath Dixit, Professor from the Institute of Mathematical Science conducted a training camp for Mathematics Olympiad. This also proved to be very useful to the students.

On 4th December 2021, Shri Pennathur Subramaniam Prabhakar started a series of lectures in which he explained various concepts by giving a helicopter view of the topics. The examples he gave made the students understand the concept of taxes, gold bonds, stock markets, cryptocurrency, etc clearly.

On 17th December 2021, G. Shekar who is a renowned Chartered Accountant and a member of the Central Council of ICAI conducted a lecture on the topic 'Goods and Service Tax'. The speaker also explained excise duty, central sales tax, VAT. This interactive session was found to be very useful to the students.

All these lectures would have not been possible without the efforts of the teachers and the principal Dr. Revathy Parameswaran

Renaissance '21

Renaissance has always been an integral part of our school's culturals; a two-day fest where students can compete, celebrate, and showcase their talents outside academics. Every year, students participate in the events with full zeal and enthusiasm. The entire school will be buzzing with joy, students asking their teachers if they could skip classes to support and hype their friends. This annual intra-school cultural event is organized and managed by the TFE editors (of course, with a little help from the teachers and school management too!).

However, this time, due to the pandemic restrictions and regulations, the event organizers

(dubbed as Team Renaissance '21) realized that a normal in-school event wouldn't be possible. They decided the best way to go about this would be to conduct the events both online and offline. And thus, on 9th July, Renaissance '21 would be initiated. Unfortunately, the inauguration was postponed to 13th July after new directives from a teacher-council meeting.

“The amount of effort that was put into this is staggering, and I felt it was of utmost importance to outline this effort and bring it to light.

”
- Aashrith Narayn,
Student Pupil Leader

Offline Event Winners

Thus, Renaissance was to be held on the 23rd and 24th of July.

The clock seemed to tick louder every second. They were at a race against time. The team had less than ten days to pull off a full-scale, two-day event. And for the first time, they had to encapture the spirit of Renaissance fully online.

With a commendable collaborative effort from the TFE team, as well as the rest of the student council, Renaissance ‘21 was a grand success. Team Renaissance ‘21 had pulled off the unthinkable. Twenty-two students, along with fourteen teachers were part of Team Renaissance '21

Some major people involved in this, without whom this wouldn’t have been possible are: ---> Aashreya Chandar - TFE Editor, who played a pivotal role in communicating and coordinating with the teachers. She also helped create the rules and the information PDFs, managed the event submissions, acted as the judge for several events, among other roles that were key for the smooth

---> Dr. Revathy Parameswaran, the school principal, who inaugurated the event and also played a role in ensuring that Renaissance ‘21 was run without any hiccups.

GREAT LAKES

*Program for
Schools*

Our school has always believed in offering students a lot of opportunities and exposure in order to develop their character and skills. The 'Great Lakes Program for Schools' (GLPS) is one such program held in partnership with the highly reputed Great Lakes institute for the students of Classes XI. Our school is one of the few schools which offers this opportunity, It has been doing for this for the past 11 years.

The students are made to learn entrepreneurship and much more. Till pre-covid times the students were even taken to the GLPS institute. However, the most recent batch to graduate had online sessions.

The latest convocation ceremony was held online, in which the names of all 53 students of the 10th batch and 21 students of 11th batch were called out and certificates were displayed.

The ceremony was graced by the presence of the following guests :

R. S. Veeravalli - currently the Director, Post Graduate Executive Program in Management (PGXPM – Executive MBA), Member – Advisory Board, AIC-GL Balachandran Incubator (AGBI), and Associate Professor, with Great Lakes Institute of Management, Chennai.

Dr. Suresh Ramanathan is the Dean & Principal of Great Lakes Institute of Management.

The ceremony was also attended by our Principal - Dr. Revathy Parameswaran, along with our Hony. Secy. & Correspondent - Dr. K.V.S. Gopalakrishnan, and Chairman - Shri. M.S. Sundara Rajan.

CAREER

GUIDANCE

For the students of classes XI and XII, our school conducted career counselling workshops for them to get a better grasp on what they want to do in college and in their career.

For the commerce students of 12th grade, counselling was conducted by Mr Ganesh Vaideeswaran, the founder and Chief Transformation Officer of Finspire Academy. The students were encouraged to break down their goals using the SMART (Specific, Measurable, Attainable, Realistic, and Time-bound) goals approach. He also gave them information about international courses like UK ACCA, US CIMA to name a few, and left the children with the thought - "Stop studying, and start learning."

Mr. Shankar Sivaramakrishnan, addressed the students of class XI and XII on the topics in Computer Science, Artificial Intelligence, Data Analytics, etc.

On 24th November 2021, Shri. Pennathur Shankar, alumnus of 1985 batch, Director Operations - Apple addressed the class XI science students on opportunities in the field of 'Engineering and Information Technology'.

Ashoka University conducted a career counselling programme for Class XII students on different courses offered by them.

A career counselling session on "Food science and Technology as a Career" was conducted by Ms. Janani Vaidhyanathan, a former FDA research assistant and Corporate food scientist on 10th January 2022.

On 29th January 2022 the Correspondent, Shri Pennathur Subramaniam Prabhakar conducted an orientation session for class 10 students. The session focused on different career opportunities after taking commerce.

On 6th February 2022, Dhruva Bhat, an alumnus of our school - batch of 2013, talked to commerce students about applications to universities in the US and UK. He talked about the requirements for admissions, and also on what to think about when you decide for a career.

MODEL UNITED NATIONS

The school bustled with excitement and pride on the first-ever online PS MUN. Having skipped a year, PSMUN's comeback was stronger than ever, its quality and grandeur not forsaken despite the challenges of conducting it online. In fact, PSMUN'21 broke many of our school's past records. With the largest turnout in PSMUN history, PSMUN '21, proudly accommodated more than 160 delegates from all over the country, proving to be nothing less than sensational. Adding on to its uniqueness,

this was the first time PSMUN was given an official name-Clarion.

Clarion had 6 committees in total-NHRC, ECOFIN, DISEC, UNSC, FSC and IPC. Each with one-of-a-kind, well sought out agendas that demanded every ounce of creativity and problem-solving skills from the delegates.

Apart from being extremely educational, Clarion PS MUN was well enjoyed by all the delegates who attended the two-day conference, spread over 10th and 11th September. However, the behind-the-scenes work must not be forgotten under the light of PSMUN's splendor.

PS MUN Organising Committee

Eight students worked day and night for over 45 days, drawing out strategies, debating ideas, and getting things done, over more than 100 calls, thousands of messages but tons of fun to present the best MUNning experience to the delegates.

An integral part of Clarion’s success goes to the chairpersons of every committee who put in a lot of effort to come up with the best, most innovative, and interesting agendas possible. Lastly, the teachers,

Committee	Chairperson1	Chairperson2	Chairperson3	Agenda
UNSC	Prisha Anand	Bhavin Shivaa, Pranav	Antariksha R	Discussing the right to self-determination with a special emphasis on the situation in Kosovo. Freeze Date: 18th Feb 2008
ECOFIN	Sudharshan Anand	Sahitya Srinath	Bhavana.B	Addressing the macroeconomic position and impacts of the ongoing Latin American debt crisis Freeze date: 15th August 1982
NHRC	Anirudh Kumar	Soundarya Lakshmi	Vedhaanth Mohan	Recommendations to make to the Supreme Court on major human rights violations
DISEC	Rithvik	Manikam	Siddharth	The destabilizing effect of foreign military bases in sovereign states
FSC	Yagneshwar Baskaran	Anirvin Srivatsan	Aakash S	Tibetan War of independence
IPC	Keerthana Shankar	Aashreya Chandar	Shravan Sumanathan	—

whose efforts and support to make this happen was by far the most important. The winners of the conference were awarded trophies and certificates.

SCINTILLATIONS '21

a name that brings back memories to school students, alumni, and teachers.

The grounds of PS Senior were lively, as students of class 12 hustled around doing preparations for the first online inter-school cultural event hosted by the school. It was their first major event, where students got together as a whole group after two years of online classes. Scintillations - a name that brought back memories to school students, alumni, and teachers. The remembrance of distant sounds of people singing, the

sneak peeks while walking from one block to another, and the crowded food stalls on the grounds, sure make us have a sense of nostalgia.

But how to bring back the same sense of joy? That was the challenge this year - to create it the best they can in an online mode. And they did. With good coordination, a few mishaps here and there, and a workaholic few days, it was organized with around forty student coordinators from class 12, twenty-six teacher coordinators, and thirty-one judges - both our school alumni and talented people from other schools.

Events conducted included Block and Tackle, Debate, Carnatic Music, Stock Exchange, Lawyers up, Codathon, Mono Acting, Quiz, Surprise Event, Spin a Yarn, Connexions, JAM (Just a Minute), Winners Event, and the judges for the events are as follows.

From 100% profit in the stock exchange, judges in other countries waking up at 3 am to attend the event, the whole event was one of a kind. Even though the winners were from different schools, the most awards were achieved by Vidya Mandir from Mylapore, who won the Overalls Winner for Scintillations '21 and Adhithya Talreja from Bhavans Rajaji Vidhyashram won the title of Mr. Scintillations '21.

The main credits goes to the members of the student council team, especially Aashrith S Narayn, Sahitya Srinath, Aashreya Chandar, Lalitasri R, Ayush Mahesh, and Mukund Bharadwaj, along with the student coordinators. Their wholehearted effort and cooperation resulted in an energetic two days, the participants' competitiveness and massive preparation vibing off with fruitful results.

Teachers' day

Thanks to the Parent Teachers Association and P.S. management, the school had hearty Teacher's Day celebrations on 8th September 2021. Dr. K.V.S. Gopalakrishnan, Hony. Secy. & Correspondent addressed all the teachers. Teachers and staff members who had completed 10 years of service were honored during the occasion. Mementos were distributed to all teaching and non-teaching staff and all P.T.A. Members.

Children's Day

As per our school's traditions, the P.T.A. distributed chocolates on the 15th of November 2021

Under the tutelage of Shri. Saketharaman, the school conducted online Bhajan classes, which was attended by 140 students from classes 2 to 8.

VIJAYADASAMI CELEBRATIONS

ON THE FESTIVE OCCASION OF VIJAYADASAMI, PS ORGANISED A PROGRAM, WITH THE REOPENING OF SCHOOL ON THE SAME DAY. THE AUDIENCE WITNESSED SOLO VOCAL PERFORMANCES BY SHAKTHI MURALIDARAN, PRATIBHA SUNDARRAMAN, MUKUND BHARADWAJ L, E. TEJASWINI, SHIVAPRIYA S, ACCOMPANIED BY MRIDANGAM AND FLUTE. THIS WAS FOLLOWED BY A TWO-PERSON NAMASANKEERTHANAM PERFORMANCE, AND MULTIPLE SOLO INSTRUMENT PERFORMANCES BY R.S. ADVAITH (FLUTE) R.S. SRISTI (VIOLIN), K. PRAVIN KUMAR (SAXOPHONE), AND PRATIBHA SUNDARRAMAN (VEENA). AND FINALLY, SAI KSHIRAJA OF XII-E GRADE CONCLUDED THIS GRAND EVENT WITH A SOLO BHARATANATYAM DANCE PERFORMANCE.

18TH OCTOBER 2021

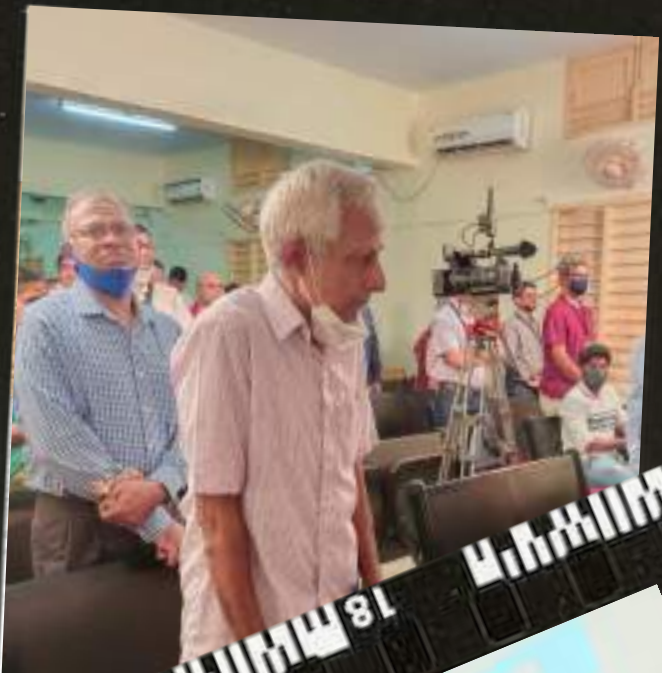

Bharathiyar Day Celebrations

On 13th December 2021, PS held a program to commemorate the celebrated tamil writer, poet and activist, Subramania Bharati. The event was filled with songs, dance and speeches memorialising the pre-eminent cultural figure. Chief guest V V Subramanian, Retd Principal, Vivekananda College brought the celebration to an end with a thought-provoking speech on Bharathiyar.

A Silver Reunion

The air was tinged with excitement and nostalgia. Old friends reunited once again and relived their innocence, as the batch of 1996 met up for their silver jubilee, on December 18th, 2021. A whirlwind of conversations filled the school grounds as everyone took a walk down memory lane. Former students met with their former teachers, as hearty chuckles and chatter revived old nicknames, and inside jokes. The group bid farewell after many hours, giddy from the evening of reminiscence.

MUN WORKSHOPS

Model United Nations is an integral part of school culture. Unfortunately, not many students know what it actually means! And so to spark the creativity and interest of students, our school has organized MUN workshops for students of classes six to eleven. These workshops aim to give them the experience and knowledge of Model United Nations comprehensively. The workshop started on the 3rd of Jan, conducted by Aakash Sundararajan and Shravan Sumanthanan from class 11C, along with M S Ananthanarayanan from class 11B, with additional coordination and guidance from Sahitya Srinath of 12 D, Anirvin Srivatsan of 12A, Aashreya Chandar of 12 E and Ms. Sarah Deo. The workshop, consisting of 6 classes, intends to introduce the students to the very basics of United Nations - how MUNs and each committee of the MUNs are structured, how to research and author documents for a MUN. The final objective is to hold a mock MUN to see how much the students could gain both theoretical and practical knowledge based on what they've learnt.

INAUGURATION OF P.S.SENIOR SASTRA C.N.R. RAO STEM LAB

The P.S.Senior SASTRA C.N.R.Rao STEM lab was inaugurated in our school campus on 08-01-2022 by Sri. S Vaidhya Subramaniam, Vice-Chancellor, SASTRA Deemed University, Thanjavur in the presence of Mr. C V Krishnan, Secretary of P.S. Educational Society, Sri. M. S. Sundara Rajan, Chairman, P.S.Senior Secondary School and Sri. P S Prabhakar, Hon. Secretary and Correspondent, P.S.Senior Secondary School. Our Principal, Dr. Revathy Parameswaran welcomed the gathering.

It has been the constant endeavour of our school to provide ample opportunities for students to explore the world beyond the curriculum. The newly inaugurated STEM lab is another step in that direction. This lab would help inculcate scientific temper, innovation and thinking in young minds and equip them to solve real-world problems that they encounter in everyday life.

We take this opportunity to thank SASTRA University for setting up the SASTRA C.N.R. RAO STEM LAB in our school after an elaborate selection process in which we competed against CBSE and State board schools across Tamilnadu.

Covid Vaccination Drive

371 students from PS Senior Secondary School, belonging to classes 9, 10, 11, and 12 have successfully been vaccinated by the CURI Hospital team. This event has been organized by our school through YRG Care, one of the largest NGOs in India. Students were first briefed about the vaccination protocol, after which they were administered COVAXIN, India's first indigenous vaccine to receive DCGI authorization.

On 26th January 2021, the grassy grounds of our school hosted Republic Day celebrations. The day marked 73 years since our constitution came into effect.

Beyond the flag hoisting and national anthem, the event featured speeches by students of our school. The speeches, especially the one about our fundamental duties(in Tamil), couldn't have inspired the audience more. They were followed by two mellifluous vocal renditions of patriotic songs and a beautiful dance performance.

Republic Day *Celebrations*

The principal and school correspondent also addressed the audience with thought-provoking insights and anecdotes about the everlasting nature of our patriotism and our need to strive for greatness.

Events conducted with such pomp in such times will never cease to amaze me. On the one hand, it would be wisest to celebrate from home to prevent the further spread of COVID-19. But on the other hand, we need such events to be a compass that leads us through these troubling times.

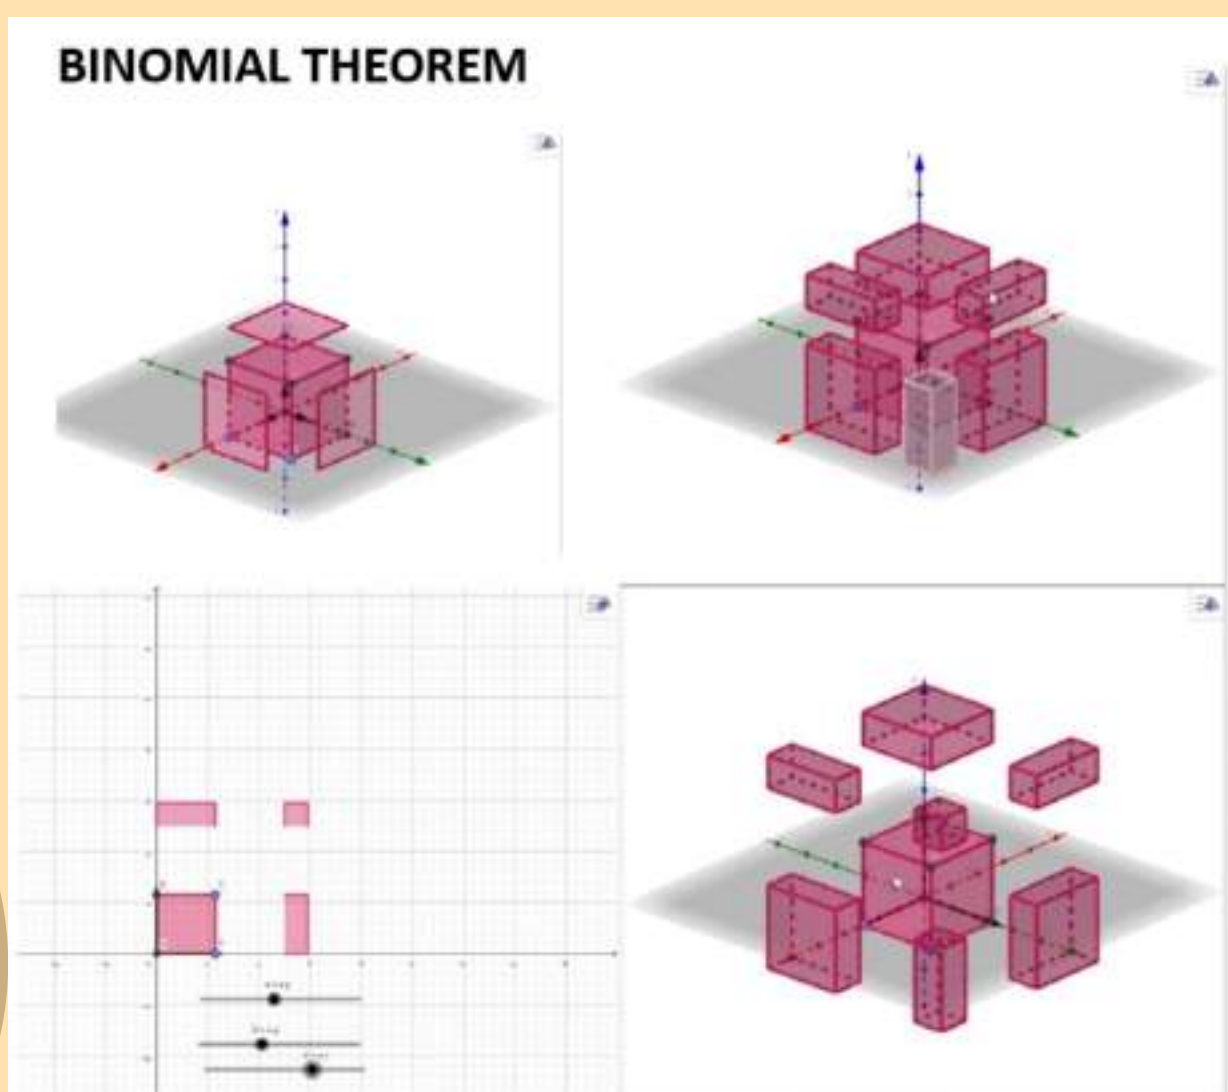

Ramanujam Week

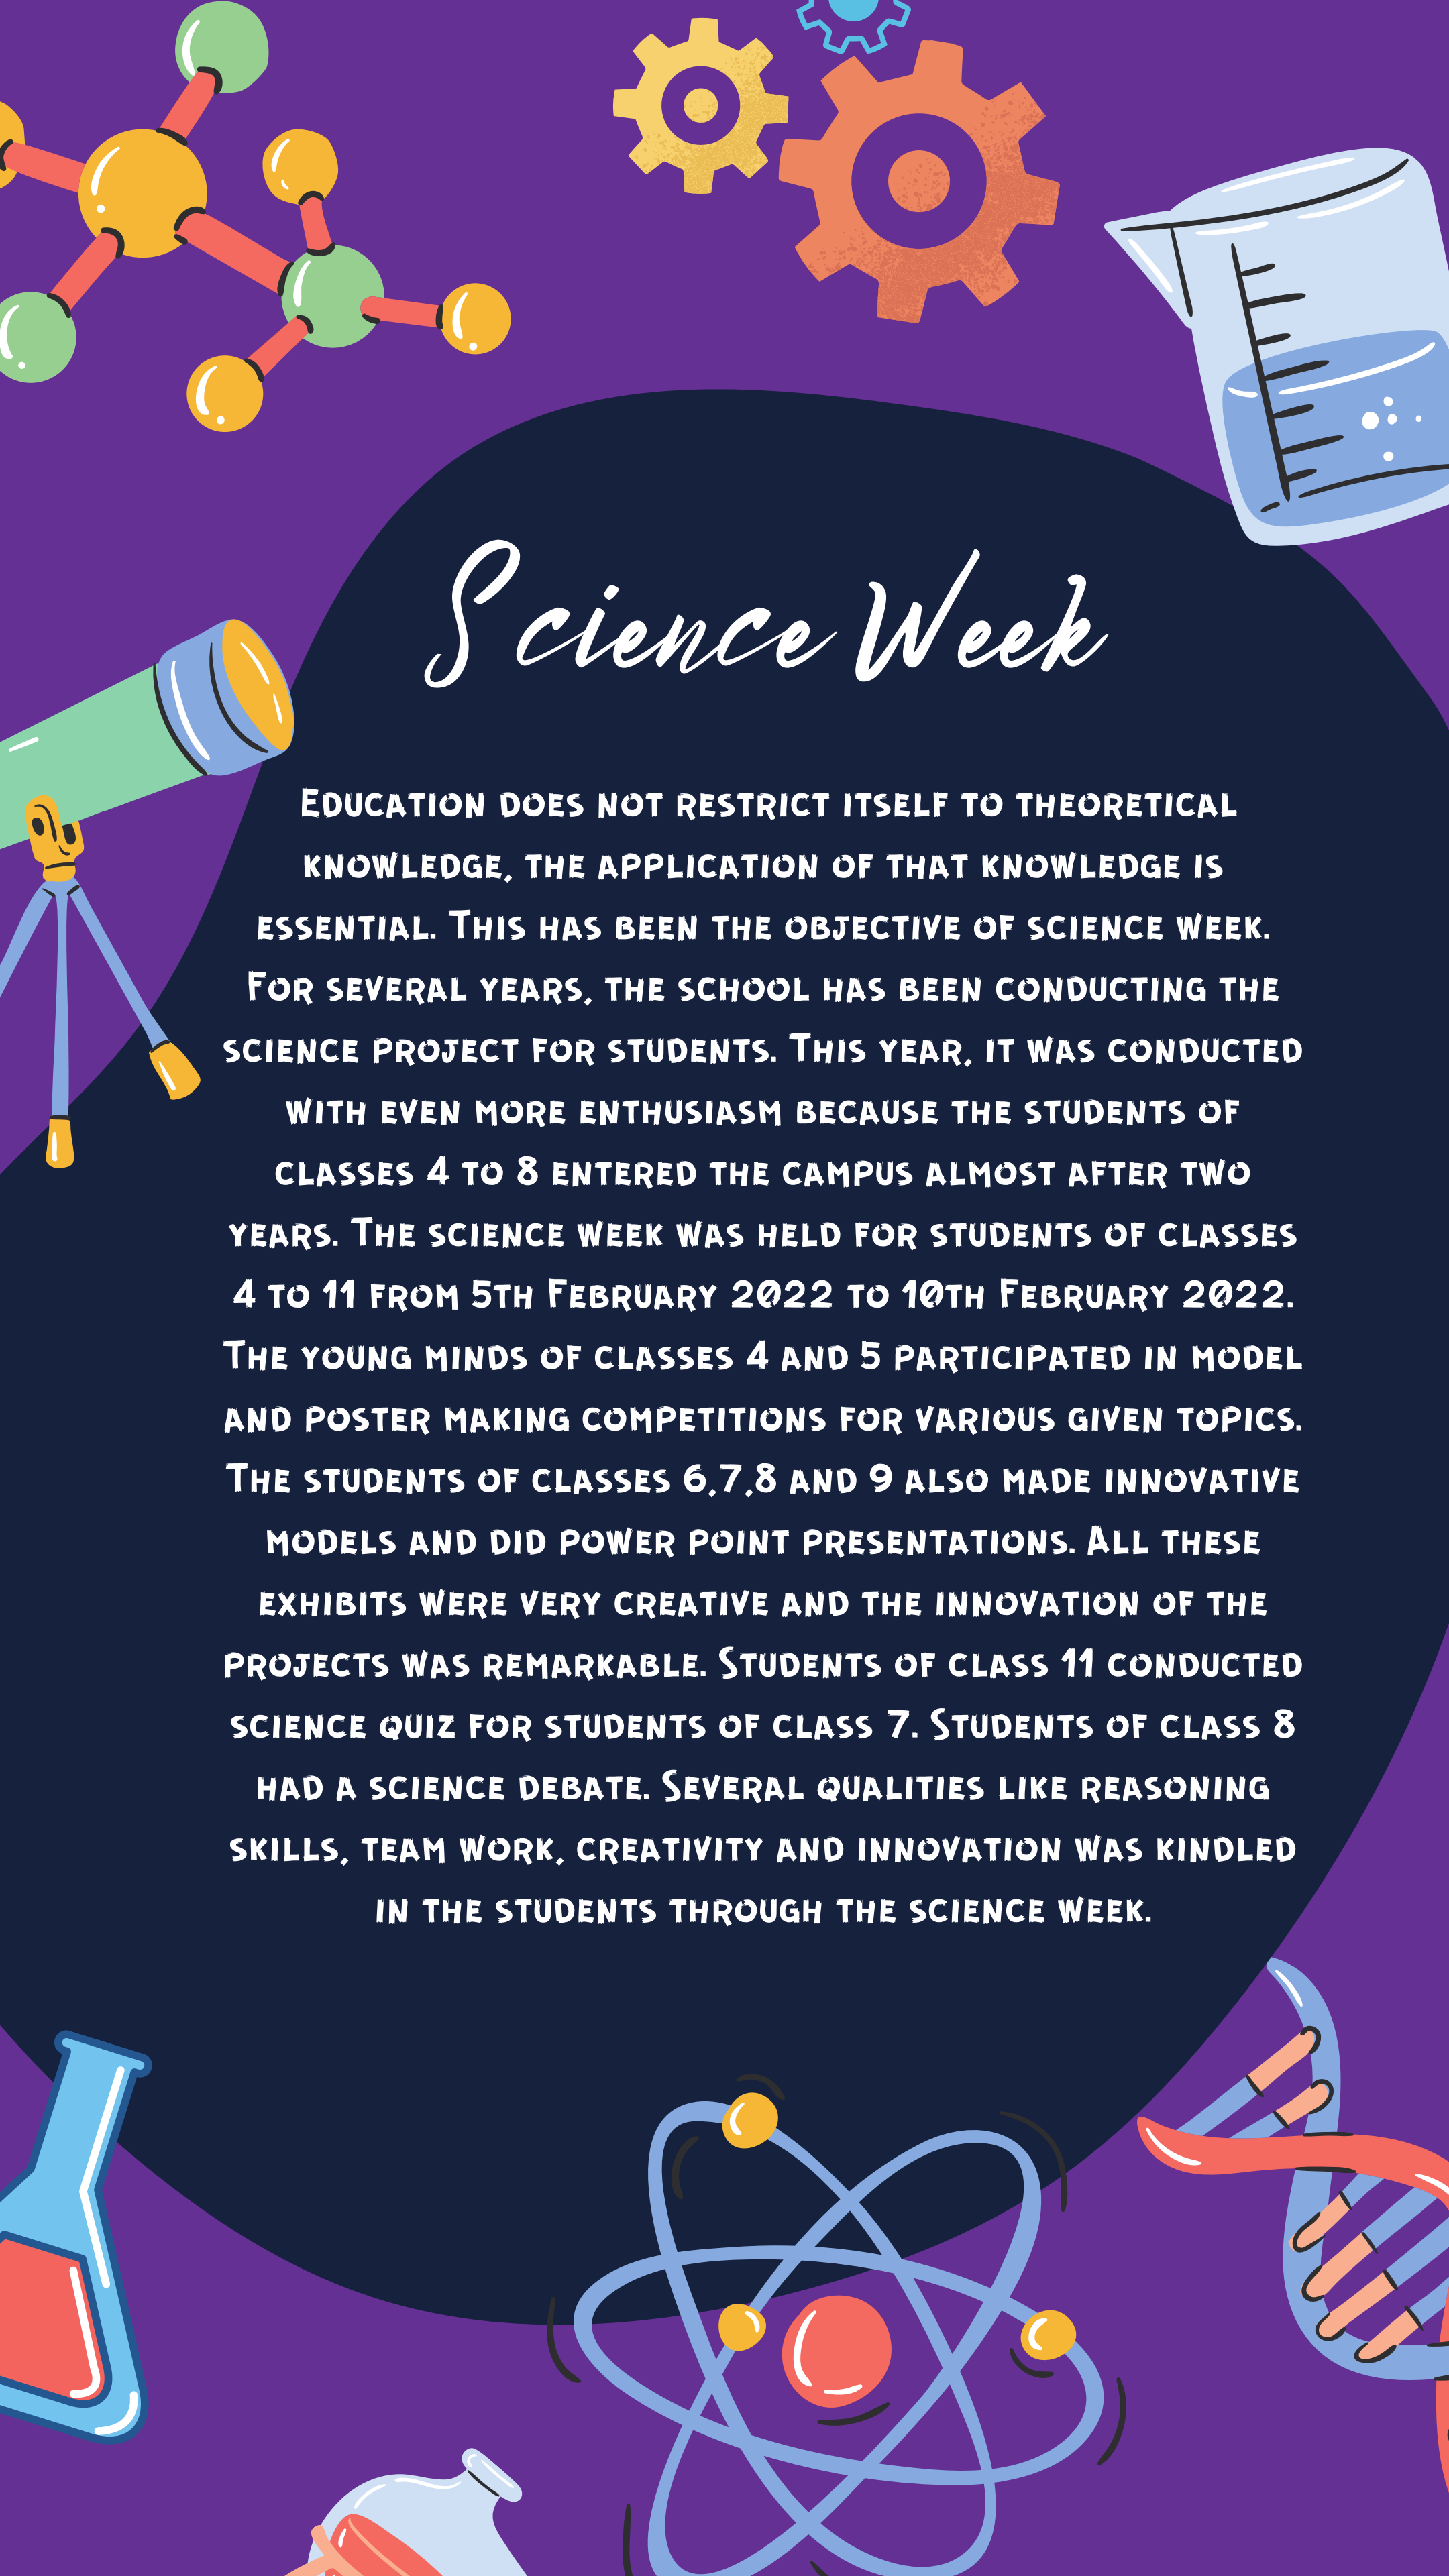

The Maths Department of P S Senior Secondary School celebrated the glory of Srinivasa Ramanujan by having a week long math Activities for students of class 6 7 8 9 and 11 which spanned from 24th January to 30th January.

The Program was an amalgamation of online and offline events, where students across sections of each classes showcased their interest and enthusiasm in competing in various activities in mathematics.

The plethora of event stretched from Math activities using paper folding technique, Explaining the details of mathematics through Geogebra (Technological enhancement), to solving math Olympiad questions.

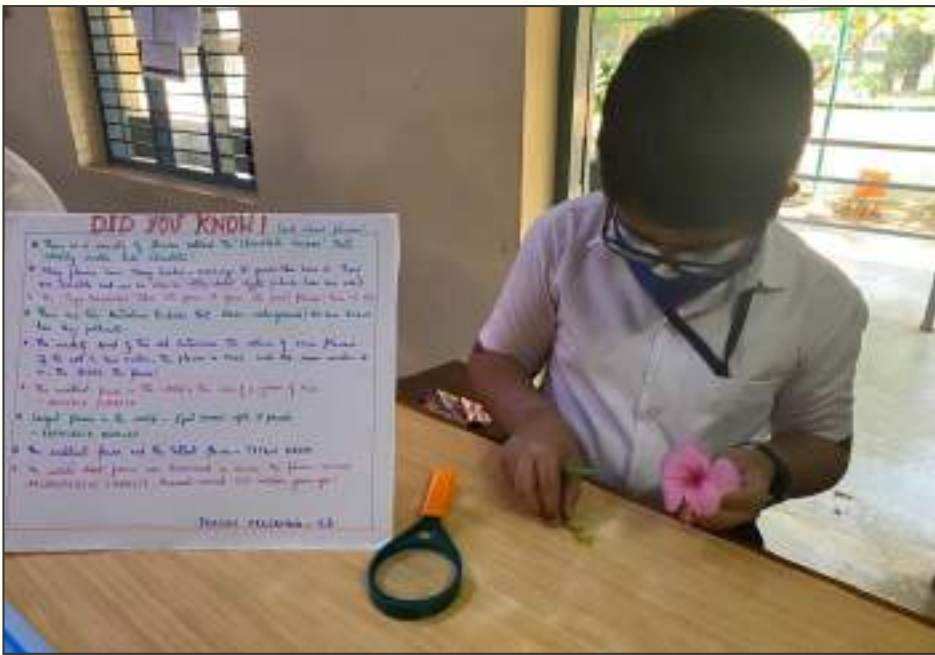

A plentitude of activities enabled students to explore various math concepts beyond the curriculum which may not have been possible to experience during the regular classes.

Science Week

EDUCATION DOES NOT RESTRICT ITSELF TO THEORETICAL KNOWLEDGE, THE APPLICATION OF THAT KNOWLEDGE IS ESSENTIAL. THIS HAS BEEN THE OBJECTIVE OF SCIENCE WEEK. FOR SEVERAL YEARS, THE SCHOOL HAS BEEN CONDUCTING THE SCIENCE PROJECT FOR STUDENTS. THIS YEAR, IT WAS CONDUCTED WITH EVEN MORE ENTHUSIASM BECAUSE THE STUDENTS OF CLASSES 4 TO 8 ENTERED THE CAMPUS ALMOST AFTER TWO YEARS. THE SCIENCE WEEK WAS HELD FOR STUDENTS OF CLASSES 4 TO 11 FROM 5TH FEBRUARY 2022 TO 10TH FEBRUARY 2022. THE YOUNG MINDS OF CLASSES 4 AND 5 PARTICIPATED IN MODEL AND POSTER MAKING COMPETITIONS FOR VARIOUS GIVEN TOPICS. THE STUDENTS OF CLASSES 6,7,8 AND 9 ALSO MADE INNOVATIVE MODELS AND DID POWER POINT PRESENTATIONS. ALL THESE EXHIBITS WERE VERY CREATIVE AND THE INNOVATION OF THE PROJECTS WAS REMARKABLE. STUDENTS OF CLASS 11 CONDUCTED SCIENCE QUIZ FOR STUDENTS OF CLASS 7. STUDENTS OF CLASS 8 HAD A SCIENCE DEBATE. SEVERAL QUALITIES LIKE REASONING SKILLS, TEAM WORK, CREATIVITY AND INNOVATION WAS KINDLED IN THE STUDENTS THROUGH THE SCIENCE WEEK.

February 18 dawned bright and early, and witnessed the school launching its very first independent inter-school debate competition, organised by the school's debate team, overseen by Mrs. Jeyalakshmi and Mrs. Aarthi.

After a brief inauguration ceremony invoking blessings, the principal Dr. Revathy Parameswaran declared the event open after welcoming all the contestants.

It was a pleasure to invite our debate proficient alumni, Vrishin and J Aadithya, to judge the competition with over ten schools participating. The well-known Mr. Krishnakumar, an IPPF member, also agreed to judge the final parley, battled out between PSBB Nungambakkam and Vidya Mandir teams.

The finals were streamed in the school's premises, with debate enthusiasts from across classes spectating.

It was a close call between the final two teams, but the panel of judges decided on the PSBB Nungambakkam team as the winners, and offered their congratulations to the VM Team on making it to the finals in an event as competitive as this.

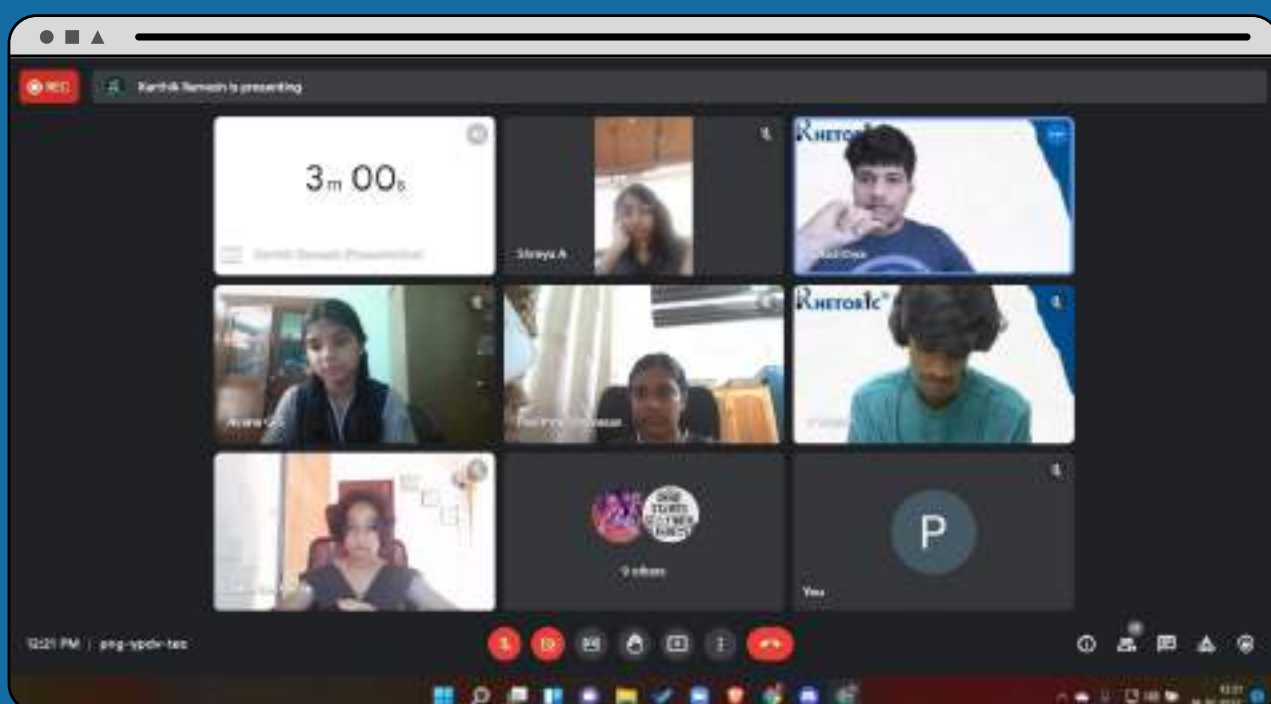

After a final message to all the participants, the School Pupil Leader gave a thanking note, mentioning all the people who made the event possible. Thus ended the first edition of PS Senior's debate competition,

 **RHETORIC**  '22

DEBATE TEAM 2021-2022

JUDGES DURING FINALS

ECONOMICS DEBATE

The 2nd edition of the Economics Debate, took place on the 4th of March for the commerce students of classes 11 and 12 in an invigorating manner as the students expressed their ideas with a special focus on the Indian economy.

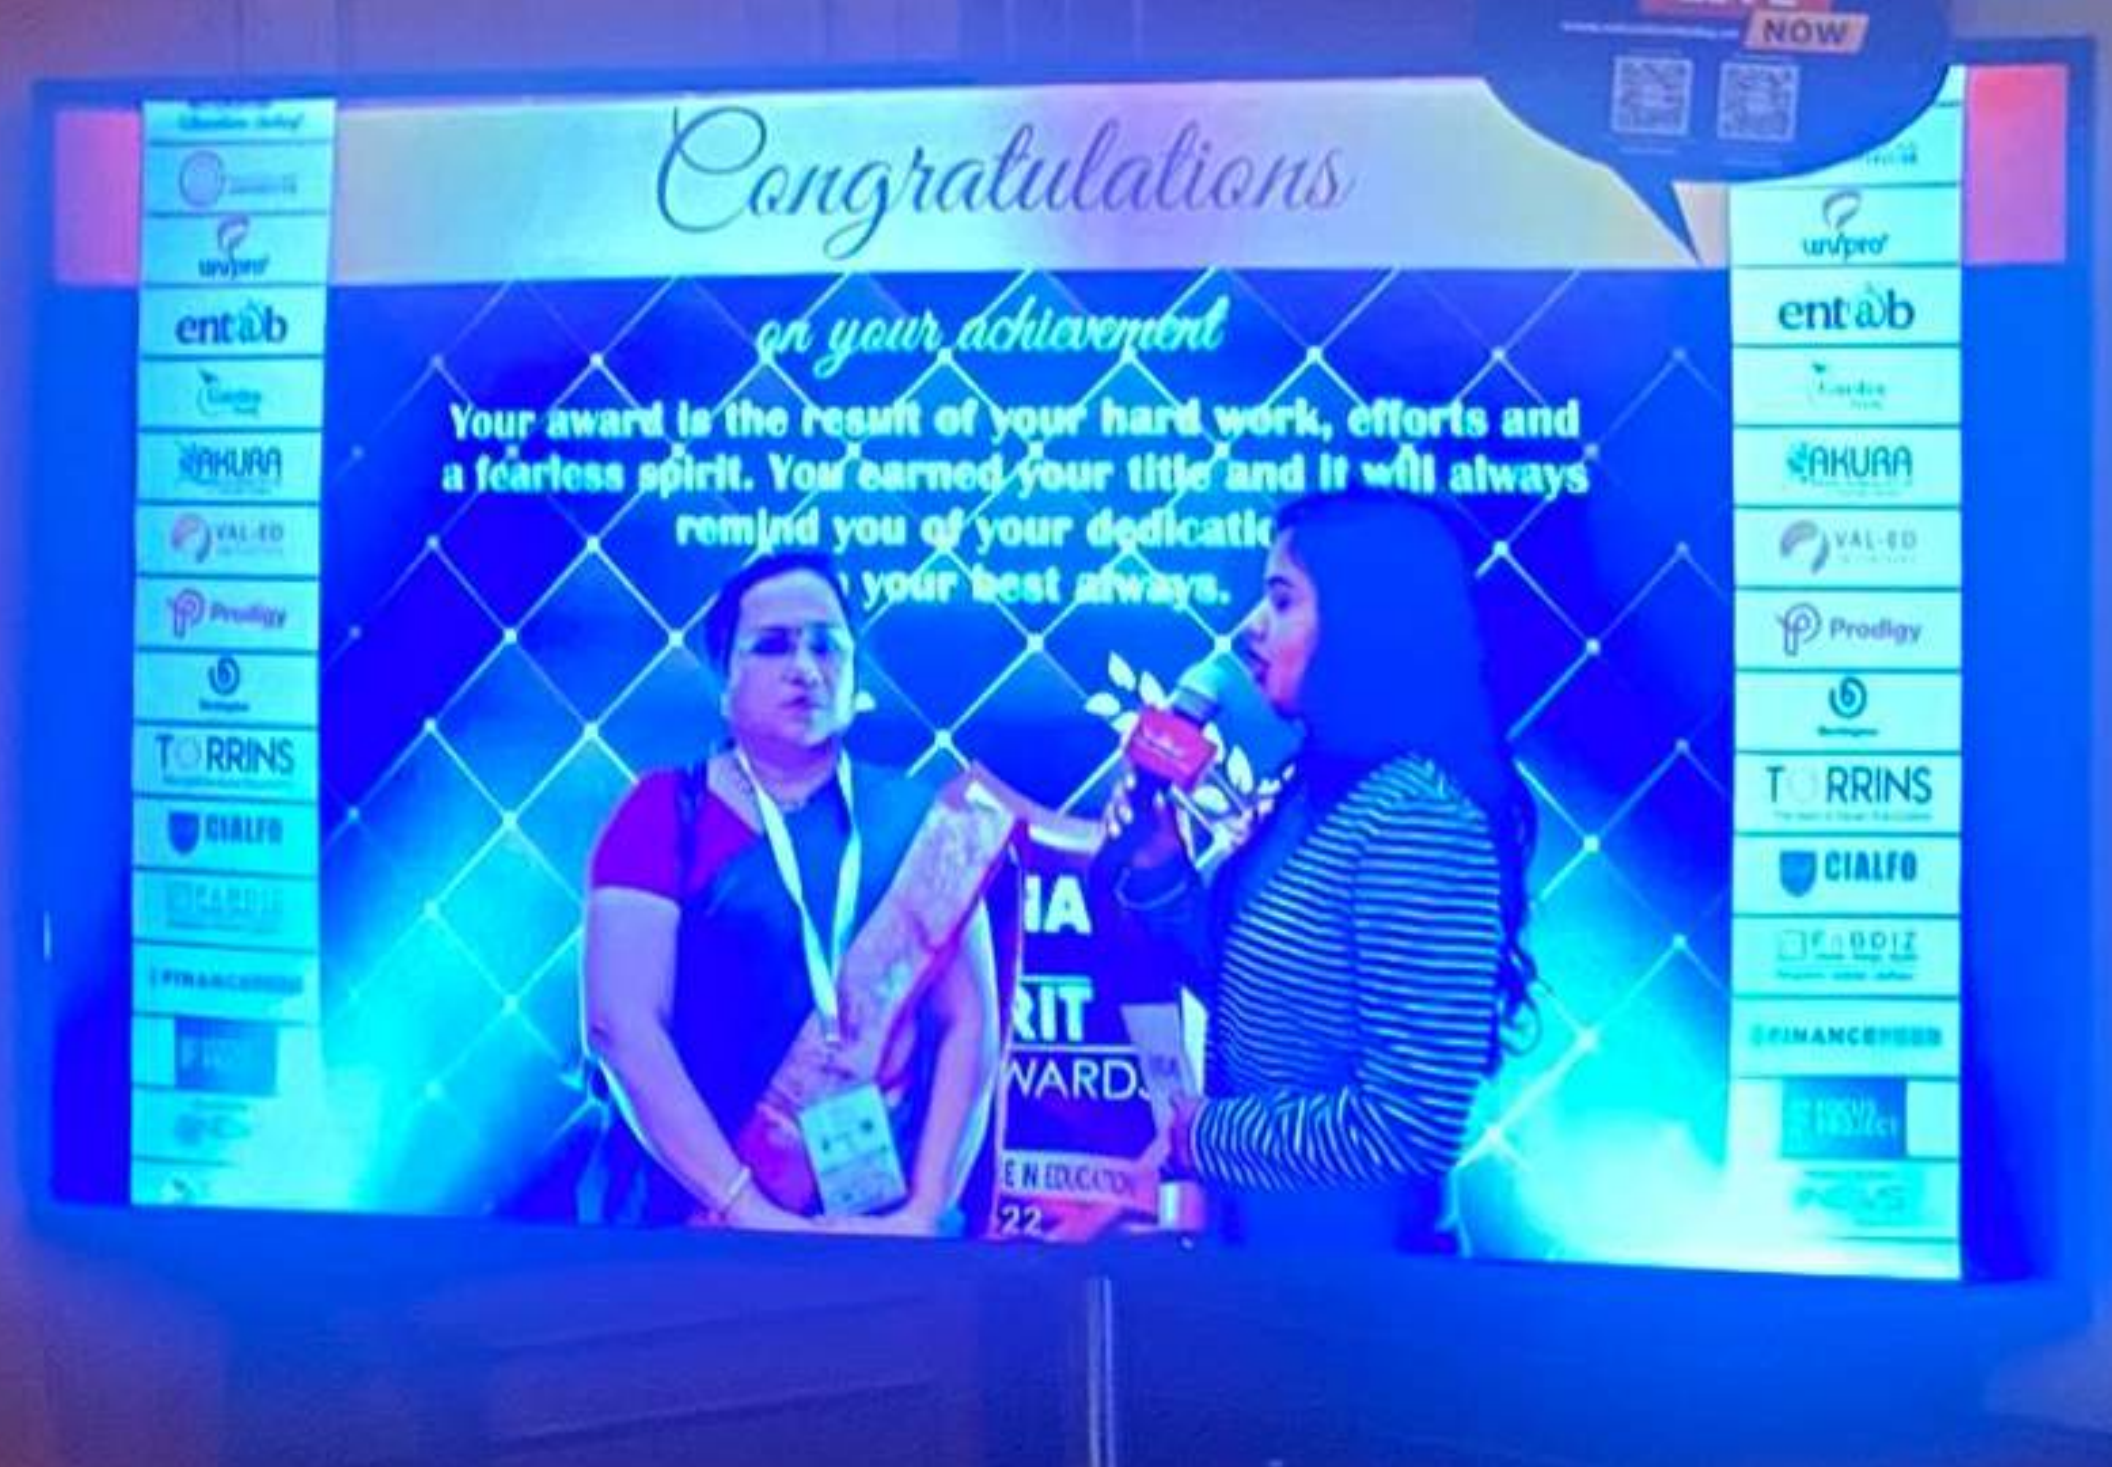

The event was organized by the teachers of the commerce department. The prelims of the event were judged by the teachers, after which a total of 16 students from classes 11 and 12 were selected for the finals. The topics and conversations revolved around subjects like Consumption Taxation, Sustainability in Economy and Ecology, Investment avenues, Gig economy, Cord Cutting, International Trade, Farm Loan Waivers, and so on.

It was an honour to have the finals of the Economics Debate be judged by a panel of distinguished experts, the Chief Guest and Hon'ble Chairman, Shri M S Sundara Rajan, and the Hon'ble. Secy. Shri Pennathur Subramaniam Prabhakar, both of whom are extremely proficient in the field of Economics, Business, and Finance. The event commenced with the participants conveying their arguments, followed up by questions raised by the judges, to test the knowledge and the critical thinking ability of the participants.

Policy reform took a center stage at the debate with arguments for financial literacy across various topics. The students explained each topic in a facile manner which reached audiences across the aisle. The speeches covered the role of the public in economy, the essence of choice and its influence from a sustainability and scalability point of view. Statistical data helped explore the hesitancy of the public and associated risks towards involvement in the market among other issues. Powerpoint Presentations were also presented with key strategies and points of tackling the problem and its understanding by each student. At the same time, the importance of effective implementation as means to carry the debate and conversation forward was the key essence of the event. The judges reflected upon the need for Economics in daily life.

After the parley came to an end, both the judges took the stage to praise the finalists and provided some practical and useful feedback for all participants, giving them additional details to enhance their knowledge. A memento was awarded to the Chief Guest by the Principal, Dr. Revathy Parameswaran. A thanking note was given by Mrs. N S R Rajeshwari, thus concluding the second edition of the Economics Debate of PS Senior Secondary School.

Education Today

Our school has been ranked No.1 in India among Top CBSE Schools under the parameter "Student Advancement and Mentoring" by "Education Today". Education today team has awarded schools under 15 different parameters primarily based on Jury Rating, Parent Voting and the Magazine Team analysis.

ACCOUNTANCY -

BEYOND JOURNAL AND LEDGER

The word accountancy conjures up first thoughts for many people. For a novice, all accountancy meant to me was addition and subtraction. I'm sure you share this misconception.

Nonetheless, I am going to share my perspective on Accounts. It's universally known that accounting is used for recording monetary transactions, but few people are interested in how accounting is used in our everyday lives.

My answer to this question won't be like the beginning chapter of any Accounts book where they would repeat the same rules of "Debit what comes in and credit what goes out".

I discovered that my entire life is governed by a simple law - "For every debit, there is an equal and corresponding credit". As a result, we are bound to follow the double-entry system until the end of our lives.

KARMA is perhaps the best known and most sung of all the sagas. Even the Almighty has a system of debit and credit. If we commit some good karmas, God credits that deed to our Profit & loss statement, and if we either intentionally or innocently do some sins, that will be debited to our Profit and Loss statement (i.e., I will have to reap what I have sown in my life), thereby decreasing the balance of our good deeds. Isn't it beautiful that even the Almighty follows basic principles of Accountancy? Money spent on our upbringing doesn't go into our pockets; instead, our parents become our creditors whose debts must be repaid.

Here's how I see accounting and I have attempted to cover a few basics in an entertaining way, I guess. Thank you

V.R. Shri Tejaswini

XI D

CRYPTO - CURRENCY

Now we all have a basic idea of what cryptocurrency is but these days, since it is becoming a popular investment venture, it might help to look at it from different perspectives. One such way is to look at it's history as a resultant solution to the financial crisis in 2008. Banks at that point had proven themselves to be an unreliable third party intermediary; ironically, they were formed to solve trust issues between any two individuals/firms. Since markets were always changing, the requirement of a new form of currency which would rise above many such problems was to be made. Today, it has become much more than that.

At the end of the day, humans who frame the regulations of the banking system, can simply change the rules, a primary problem which crypto avoids by eliminating an intermediary. For context, every person in the platform has a unique digital ledger/individual blockchain in which all transactions of cryptocurrency are recorded. But here is the trick, they are not just your transactions.

To give an example, say your friend bought a chocolate for you and you promise to pay him Rs.30 for it the following day. When you make the transaction, imagine you invited the entire school as witnesses to your transaction (an equivalent to "I promise to pay the bearer") and ask them to record the transaction and upload it in the cloud so that its deletion becomes tumultuous at the least. In reality the entire school is everyone in the world who exists on the blockchain platform and the recording is the entry of a transaction between you and your friends in their digital ledger as well.

So every single transaction on bitcoin, finds itself to be entered in everybody's ledger so that its legitimacy cannot be questioned. Addressing the security aspect of it, imagine it like this, you lost your wallet on the train, but the passenger says, do not worry I happen to have a copy of your wallet with me. This way loss is quite easily replaceable with your unique code, your account is secure just like a bank locker.

But the thin line between loss and theft makes this aspect of cryptocurrency a bit alarming. Since you are eliminating the intermediary, the security of your assets is to be done by you. These days you find apps acting as a crypto bank so that the security of your transaction is maintained, which opposes the basic principle of blockchain, but it provides simplicity to the users, who look at it as an investment opportunity.

Since crypto is limited in number so that it's value is always high, not just anybody can become witnesses, just like how there is an admission criteria, we have eligibility for miners of currency. It's essentially a race, the faster your computer can process, the faster you mine. Then its legitimacy is checked by professionals. Say substituting the values of x and y in the equation to see whether the answer corresponds. The more witnesses you invite, your transaction becomes more legitimate, hence the incentive to invite more witnesses is built into the system. And if ever the validity of the transaction is questioned, 51% of all witnesses need to agree. So it provides independence with an entirely different kind of security. A good reason why it is becoming popular is that it is constantly evolving. If you are planning to invest, you might be too late as now if you wish to obtain affordable bitcoin, you can buy 1/5th of it. So if you see the benefit as a viable investment, hurry we say.

Wonder Material

The stories we read in our sci-fi books about interplanetary travel will soon become reality. But just like every other time in history, we have certain problems. In short, we need better materials for building the things we require to colonize other planets and star systems, without which all our sci-fi dreams would be impossible.

But what if this wonder material could be derived from something as simple as your pencil? Graphene is an allotrope of carbon, consisting of a single layer of atoms arranged in a two-dimensional honeycomb lattice nanostructure. The name is derived from "graphite" and the suffix, "ene," reflecting the fact that the graphite allotrope of carbon contains numerous double bonds. In 2004, the material was rediscovered, isolated, and investigated at the University of Manchester, by Andre Geim and Konstantin Novoselov. High-quality graphene proved to be surprisingly easy to isolate. In 2010, Geim and Novoselov were awarded the Nobel Prize in Physics for their groundbreaking experiments regarding the two dimensional material - graphene.

Due to its structural arrangement and chemical bonding, it serves as a zero-gap semiconductor. It is so strong that a single-atom layer thick graphene wouldn't break even if you somehow managed to make an elephant stand on top of an ordinary pencil. It is also so light that it takes a 100-litre barrel to store nearly 1.5 to 2 kg of graphene.

A rapidly increasing list of production techniques have been developed to enable graphene's use in commercial applications. If all goes well in the current phase, Graphene may as well become a wonder material that can transform our lives in ways we can't even think about. Graphene made wearable electronics will take over the market in no time once graphene production is boosted.

At the end of the day, what really matters is whether a product makes our lives better or worse, upon which a wonder material is decided.

My favourite subject - Economics

Commerce is an ocean. It has so many broad categories and subjects. In my opinion, I suggest not to believe in any kind of stereotypes relating to the content or difficulty level of commerce subjects. I myself was a person who believed those until I took commerce stream as my path. Amongst those, I think the most stereotypical is that 'Economics is a dry subject'.

But I strongly disagree with that. Once I started studying economics in my class, I felt it had so many things which are useful in practical life. That's when I realised that economics is a subject which by itself is an ocean of knowledge than all the other subjects put together. I realised this world is nothing without economics. It is a subject which is boundless. What I most like about economics is that it keeps on getting updated and doesn't teach us the same thing everyday. It talks about everything around us, it can be compared to the children of this generation who constantly get updated with technology. Economics is similar to that. It will keep you updated with everything happening around us. If we go to an interview, a public gathering or any other intellectual and cultural events, you will be judged and evaluated only on the amount of current affairs, which is predominantly the amount of knowledge of economics we have, followed by our communication skills. I hope this article helped you.

The PHYSICS BEHIND ROCKETS

Rocket science is a branch of physics and engineering involved in making fiction to fact. Firstly, What is a rocket? As per the definition, it is a pressurised vessel carrying a payload to a specific orbit using a rocket engine. Rockets work on the principle of jet propulsion that is shooting out propellant at a very rapid rate causing a thrust force upwards. Hence cannot be considered as a projectile. The main part of any rocket is the booster. This is the part that carries it through the atmosphere and releases the second stage into the vacuum. The booster has two main parts namely the rocket engine mechanism and the fuel tank. The rocket engine could either be a bell nozzle or a hypothetical aerospike engine. A bell nozzle propels out fuel with best efficiency in a particular direction.

An interesting fact to note is that the diameter of the nozzle is bigger in the vacuum stage than the first stage. This is because the ambient air pressure is much less at higher altitudes, hence the exhaust plume expands, reducing efficiency. To counter this problem, the second stage has a larger diameter. Apart from this, the rockets also have grid fins and cold/hot gas thrusters which are used for steering mainly in the horizontal axes to prevent rotation in the wrong direction and are arranged at an angle of $120^\circ, 60^\circ$. This is surprising, because symmetrically, it should be arranged at 90° but because only two axes are required for control, the duplet angle would be more effective. First used in 1959, the slingshotting mechanism is the most effective way to reduce fuel consumption. Though we say that for a rocket gravitational pull becomes a major hindrance, the rockets can revolve in an increasing elliptical orbit, with the right timing of sudden thrust by rocket engine they could move with a very high velocity to their destination. To conclude, we can all agree that rockets are one of the coolest creations because they have the capability of making humans an interplanetary species, to explore space as well as discover more of the secrets that lie beyond.

My favourite subject - Business Studies

I have always been curious about how businesses work. But now I have the opportunity to learn about it and I'm thankful for it. Learning about how management, leadership and decision-making can improve performance in marketing, operational, financial and human resources is intriguing. I knew I wanted to opt for commerce when I peeped into my sister's class 11 business textbook when I was in class 9 and I found it very interesting. At first, I thought that it would be like social science seeing that it was full of theory but only when I learnt it, I learnt the difference. The main reason I like business studies and commerce is because what I learn is what I see in my daily life in the newspapers and magazines, so it was easy to understand and comprehend. My teachers are approachable and friendly so learning about commerce is even more fun. Though I like all the subjects in commerce, I like business studies the most.

SOCIAL PROJECT

Our nation is celebrating the 75th anniversary of our Independence. To commemorate, a nationwide program was initiated by the honourable Prime minister. All the students took part in the events enthusiastically. Our young thinkers have used this opportunity to showcase their creative thinking and writing skills. The following were the activities done by our students.

1. Poster making on the topic 'Freedom Fighters'.
2. Activity about the places related to the freedom struggle.
3. A glimpse of Jammu and Kashmir and Ladakh. (Ek Bharat Shreshtha Bharat)

Please click the link below to view the projects:

SPORTS ACHIEVEMENTS

SPORTS ACHIEVEMENTS

In the CSS Multisport Triathlon Open organized by Sri Ramachandra University, Porur, Chennai on 29.08.2021, S.D. Sai Lohitaksh, IX C won a Silver Medal under Youth Category.

Emerging “Little Master” of our school, Ayush Mahesh, XII C was a part of the Cricket Squad of Tamil Nadu Premier League for Siechem Madurai Panthers during July – August 2021.

The Archery Association of Tamil Nadu at MGR Janaki College, Chennai conducted the 14th Tamil Nadu State Archery Championships – 2021 in the month of November and the THE LITTLE ARJUNA of our school, V Vihas, I B under the category 5 to 7 won a Gold Medal in Compound Bow Category.

HRITHIKA S XI B

Yet another star to shine in the sports firmament is S.Hrithika currently in XI B at our school. Her achievements at the National level are as follows

- 1st State Ranking Tournament SRM Institute, Chennai
02.10.2021 to 03 10.2021, category under 19, Girls Singles
Position: Quarter Finalist.
- 2nd State Ranking Table Tennis Tournament, RAMAN TT High Performance Centre Chennai
10.10.2021 to 11.10.2021, category under 19, Girls Singles

At the State Level, Hrithika has an equally laudable track record :

- Inter District Championships, PSG College, Coimbatore - 16.04.2021 to 18.04.2021, category women, Event: Team, Position: Chennai Team Gold
- Inter District Championships, PSG College, Coimbatore - 16.04.2021 to 18.04.2021, category under 21, Event: Individual, Position: Gold
- Inter District Championships, PSG College, Coimbatore - 16.04.2021 to 18.04.2021, category women, Event: Individual, Position: Silver
- Inter District Championships, PSG College, Coimbatore - 16.04.2021 to 18.04.2021, category under 21, Event: Team, Position: Chennai Team Gold

M. Hansini - VII B

Hansini is a promising star in Table Tennis and has won laurels at the International Table Tennis arena. The following is a brief look at the various International tournaments she had participated & won recently

2021 WTT YOUTH CONTENDER TUNIS, TUNISIA
13.09.2021 to 19.09.2021, category under 13,
Position : Gold Medal

2021 WTT YOUTH CONTENDER OTOCEC,SLOVENIA
07.09.2021 to 10.09.2021, category under 15,
Position : Round off 16

2021 WTT YOUTH CONTENDER VARAZDIN,CROATIA
04.09.2021 to 06.09.2021, category under 15,
Position : Round off 16

2021 WTT YOUTH CONTENDER VARAZDIN,CROATIA
04.09.2021 to 06.09.2021, category under 13,
Position : Bronze Medal

2021 WTT YOUTH CONTENDER MUSCAT, MUSCAT
10.10.2021 to 15.10.2021, category under 13,
Position : Gold Medal

2021 WTT YOUTH CONTENDER MUSCAT, MUSCAT
10.10.2021 to 15.10.2021, category under 15,
Position : Silver Medal

2021 WTT YOUTH CONTENDER TUNIS, TUNISIA
13.09.2021 to 19.09.2021, category under 15,
Position : Round off 8

She will attend WORLD HOPES IITF CAMP and CHALLENGE in JORDAN in December 2021.
She is the only Indian and one among 3 from Asia to qualify for the same..

At the National and State level also, Hansini has added a few more feathers to her glorious cap

1st state Ranking Tournament SRM Institute, Chennai
02.10.2021 to 03 10.2021, category under 13 and 15,
Position : Gold Medal

1 st state Ranking Tournament SRM Institute, Chennai
02.10.2021 to 03 10.2021, category under 17,

Student Workshops

Webinar on Cyber security Awareness was conducted by ISAC Foundation for Students on 29th June 2021. Students of Classes 8,9 and 10 attended the webinar.

On 8th November, Mr. Shankar Sivaramakrishnan, co-founder of a recently launched early-stage startup, which is developing a novel SaaS product improve visual collaboration for learners, researchers etc. addressed the Computer Science students of Class XII and XI on topics based on Computer Science, Artificial Intelligence, Data Analytics, etc.

The Principal Smt. Revathy Parameswaran conducted a one hour session on "Stress Management – facing exams without fear" for students of class 12 on 10th November 2021 in the online mode. The session focused on various factors contributing stress and stress elimination techniques. It was an interactive session and students were asked to give their opinions for a survey through an online app. The Principal told the students that exams were only a part of the learning process and not the end of education.

Three Class XII students – Anirvin, Aashrith and Kshiraja conducted a debate workshop for students to prepare them on the WSDC form of debating, they also chose 2 teams of 4 to represent the school in the ISDS selections.

On 13.12.2021
Ramanujam Day was celebrated and Principal gave a lecture for Class XII students

On 04.12.2021
Correspondent Shri P.S. Prabhakar addressed the Class XI Commerce students

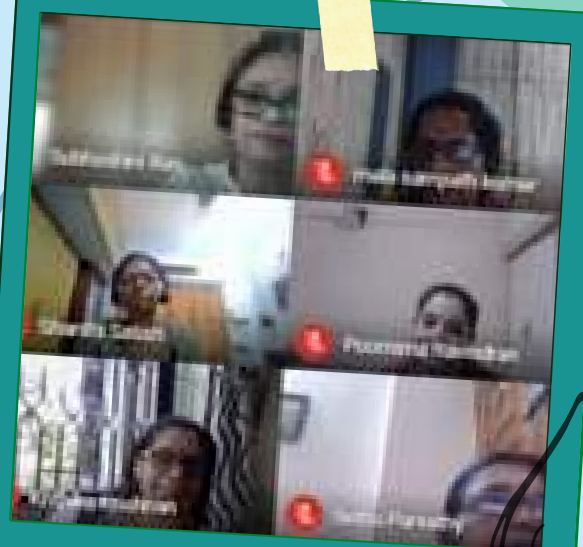

Teacher's workshop

"Learn continually - there's always one more thing to learn." - Steve Jobs

This COVID lockdown has been a new experience for all of us, and from that were a few changes in the mode of teaching. For students are not that focused when it comes to staring at a blank screen, and teachers, apart from learning virtual mode of communication, had to make sure that the classes were not too monotonous in order to keep the student interested and there comes the workshops, for hats off to the teachers for continuously putting the effort on learning things constantly so that we, the student body, can learn better to know better to achieve better. Thank you teachers, for always adapting with the current scenario and for putting the effort for us, your students. We are forever grateful for it.

An English workshop was conducted for the teachers handling classes KG to class 8 in PSES Schools on the topic "The 4 language skills for complete communication" on 31.05.2021. Mrs Subhashini Rao, HOD English, P. S. Senior Secondary School was the resource person.

An English Communication Enhancement Workshop for primary teachers was conducted by Mrs. Subhashini Rao and Mrs. V. Jeyalakshmi, Senior faculties from English Department.

As a Resource Person of the Centre of Excellence, CBSE, Dr. Revathy Parameswaran, conducted a number of online workshops on the following topics for school teachers.

- NEP School Education curriculum & Pedagogy
- Transaction of Mathematics for teachers handling Primary, Secondary & Senior Secondary
- Art Integration in Mathematics
- ICT in Mathematics

A Tamil workshop by Dr E Bhagavathy, Head of the Tamil Department was conducted on 5th June 2021. All Tamil teachers from schools under P.S. Educational Society participated in the workshop.

A talk on Gender Matters

A talk by Ms. Swarna Rajagopalan on "Gender matters" on 9th June between 3 to 4.30 p.m. Swarna Rajagopalan, an Indian political scientist, is the Founder and Director for the Prajnya Trust – a nonprofit organisation based in Chennai which undertakes research, public education and networking on issues related to peace, justice and security. All teachers handling classes 6 to 12, PT teachers and Art teachers from schools under P.S. Educational Society participated in the workshop.

Principal Dr. Revathy Parameswaran along with Mr. S.U. Gopalakrishnan conducted a workshop for Coimbatore Sahodaya Complex on "New Assessment Pattern" on 15.09.2021.

Wellness Session for Teachers
Mr. Ashok Rajagopalan alumnus of 1987 batch is conducting wellness sessions for all teachers. The series is aimed to teach simple and effective tools to cultivate mindfulness in daily life.

The first session was focused on context setting and talking about how to apply the tools of Yoga to address stress and share some fundamental breathing practice. The ongoing sessions are focused on teaching simple techniques of Pranayama and usage of Mantras to develop emotional resilience

Principal Dr. Revathy Parameswaran has been appointed as a Resource Person for training Principals on "Pedagogical Leadership" for CoE Chennai and CoE Delhi East.

As a resource person of Centre of Excellence Dr. Revathy Parameswaran conducted workshops for CBSE teachers across the country and topics like Constructivism, Blooms taxonomy and its applications.

As a resource person of Centre of Excellence, CBSE, Chennai and Delhi East Dr. Revathy Parameswaran conducted Pedagogical Leadership workshops for school Principals

PS Musings

Hello everybody!
Welcome to student talks!
Here is how this is going to work-we will be asking you some (hopefully) interesting questions...and all you've got to do is answer it (I know I know - a lot of work)..
We trust you will maintain decorum and show wisdom (please don't make me regret saying this)
Off we begin! Happy answering!!

What is one thing you would do if you were the president?

Promote and encourage art and design as careers. Times have changed but the stigmas associated with these fields are still rampant in a typical Indian society. It's time we realised the existence of other ambitions.

Hey that ain't a bad idea!

Schools only during week ends.
Ban homework.

First show off to all that i am the president.

Sleep. Just sleep.

PS Musings

Okayyy, we're just gonna move on-
Next question: Pineapple on pizza?

Student 23 left the chat

Student 14 left the chat

Student 48 left the chat

Student 79 left the chat

WAIT WAIT WE'LL SKIP TO THE
NEXT QUESTION

What if all the incidents happening in your
life are just a dream?

where is the settings menu
would like to reduce the difficulty

I'd try to overcome my fears
and go on daring trips and
such. After all, it's just a dream!

are you saying I don't have to do my
homework right now 😊😊

I am not saying anything! 😊😊

Sleep. Just sleep.

You know you can give more than
one answer, right?

PS Musings

Hold on a sec- what if YOU are not real? What if you are a part of my dreams as well?

....Let's move on to the next question shall we?

Do you think aliens exist?

yeah sure maybe

no way. then they may be invaders or something

what if we are the aliens?

okay.... moving on...

hey that may be it!

we are again getting off topic. Next question...

Hold on a sec- what if the dinosaur theory is true? what if the escape pod was real?

then yippee we survived. anyway, the next question is, what, according to you is the biggest achievement in life?

PS Musings

Doing things without procrastinating

Going to Mars

Hey, according to the theory, we came from Mars!

A life without regrets

nothing. absolutely nothing

okay then. If you could have a super power, what would you choose?

Feel others emotions

Ohhh im not sure... Like if nobody gets any powers, then just anything would do... Or if I'm smart enough to use the power, then again, anything would do... Mind reading is cool

Man, this question really makes me think for a long time, but I'm gonna go simple, I just wanna be a simple human being...

PS Musings

A power which saves me from covid... Oh wait, that should be for everyone. For me, I would ask for the power to autofill forms, like any form

okay... Next question - If you invent the time machine, which era would you like to go?

The future, going to the past simply means that you are going to an objectively worse time scientifically and technologically.

To the end of the universe , to the end of time and everything that ever was , to see the things that made us and our worlds emanate from the black voids that they fell into one last time before it all stops , either collapsing on itself or not having enough gravity to do anything anymore . The universe can finally halt and rest , time will become yet another thing . It would be a conclusion .

wow okay...

To the moment when my life gets changed (it's an art of possibility it may be for the good or for the worse).

PS Musings

If i were to time travel then I'd take with me all the money I have and apply for a loan so that I could have a million dollars with me, so taking all this money I'd go back to the 1980's, to be precise 1986 and I'd buy a \$1000000 worth of Microsoft stock and become rich . The money I'd get back would be 100 times more than enough to repay my loan.

What is one thing you wish adults did better?

They ought to understand that money is just a value and one doesn't succeed just because they are financially stable

Respect everybody equally

Honestly follow their own advice and not be hypocrites

Accept that being a youtuber is a job

Keeping quiet.

I- I'm just gonna.....move on to the next question-

Would you rather climb Mount Everest or swim to the bottom of the Pacific ocean (forget about being attacked by creatures)? Why?

Pacific Ocean - Calm

Huh-interesting...The only thing I can think of when you say ocean is sharks and tsunamis (sigh)

PS Musings

Mt Everest - I can witness the oceans from the top but can't witness the mountains from under the sea

Mount everest - Eh it was a momentary decision

Pacific ocean - to find out if mermaids really exist

Hmm.... Now I am going to allow one more response-so MAKE IT COUNT

Mt EVEREST - There's probably better phone signal under the sea than on the Everest

I am just going move on to the next one before I cry..
How much is a lot of money?

Satisfaction

One Pure heart

Wow-the amount of wisdom here is amazing!

More than Brad Pitt's Salary

24^17973 trillion USD

I need more **wise** answers guys

Depends on if you're Elon Musk
